ReadyRange™: Cyber Range as a Service

ManTech's ReadyRange™ uses hybrid cloud integration to provide a safe and legal place to detonate malware and deploy other malicious activities, test systems and software, and perform cyber training on ManTech's ACRE® cyber range. ReadyRange™ provides the users with persistent access to a dedicated ACRE® environment featuring pre-staged systems and network configuration items. The web interface of ReadyRange™ allows users to build custom environments and conduct unlimited self-directed testing, training, exercises, and experimentation. Environments can be rapidly reset to original states and specific times. For those pressed for time or resources, ReadyRange™ offers an automation tool, with quick-start templates to support rapid development of maximally realistic networks for immediate testing and training. ReadyRange™ is available by tiered subscription service and is accessible via remote connection.

ReadyRange™ is Hyper-Realistic Testing:

- Cyber Range as a service
- Safe and legal place to detonate malware, assess impact, and deploy countermeasures
- Cyber services platform for testing tools, techniques, and procedures
- ReadyRange™ Express automated range customization and delivery
- Hybrid cloud integration
- Persistent access and rapid environment reset
- Maximally realistic IT environments and professional development
- Development test lab enables unlimited testing for experimenting and *proof-of-concept* prototyping

ReadyRange™ is Workforce Development:

- "Train as You Fight" professional development services
- Go hands-on and get realistic experience
- Train on cyber defense in real-time
- Conduct live-fire exercises
- Simulate "a bad day at work"
- Test incident response knowledge/decisions
- Practice and improve Enterprise Cyber Security effectiveness, risk management and contingency operations
- Evaluate risk mitigation strategies
- Identify risks, assess current risk strategy, business impact, and sizing/cost of risk
- Get custom-developed exercises available upon request
