

 **ConstantView®**

ConstantView® is ManTech's Project Management Information System (PMIS) for program managers, customers, and suppliers to exchange documents, manage risks, track deliverables, and manage project staff, finances, tasks, and communications within a secure web-based portal. All information contained within ConstantView® is either refreshed nightly from ManTech's enterprise business systems or delivered in real time. Whether you are interested in contract, financial, deliverable, or supply chain information, all program management information is readily accessible with a few mouse clicks to make timely decisions and monitor execution.

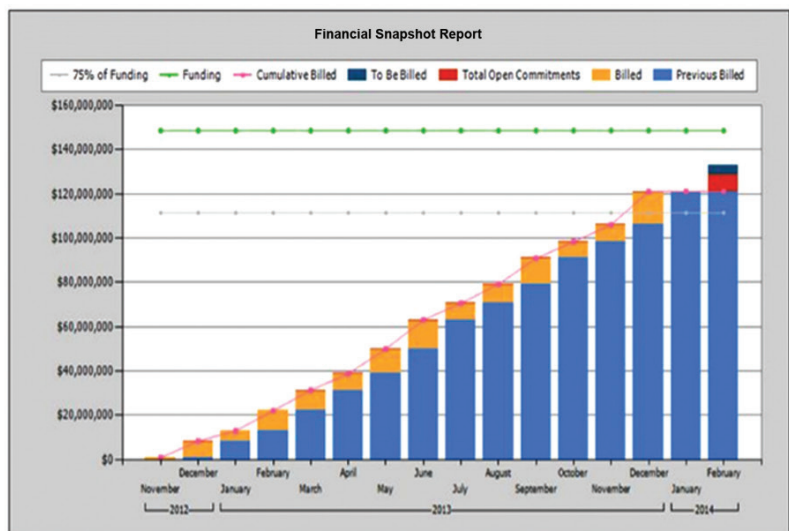

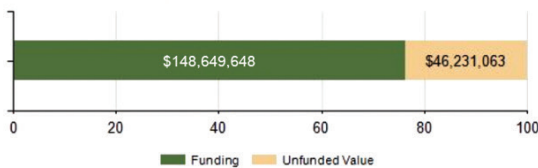

*"ConstantView is an innovative and intuitive tool that makes finding, extracting, and using critical information easier. . . Team ManTech increases transparency and reduces risk by making it easy to find information."*

- US Army Contract CPAR

Current Period Ceiling - Funding vs. Unfunded Value

## ConstantView® is:

- **PROVEN** - in use today on more than 800 projects.
- **USER-FRIENDLY** - provides an intuitive and easy to navigate user interface.
- **SECURE** - protects all data via authenticated, role-based access and robust encryption when communicating with end-user systems. Access to ConstantView® is managed through an approval process, and system transactions are logged in an enterprise-class security information and event management system.
- **COLLABORATIVE** - enables ManTech and its customers and suppliers to share documents and other information.
- **EFFICIENT** - reduces re-work by decreasing the risk of data input errors. Much of the data is generated automatically from ManTech's enterprise business systems.
- **CONTINUALLY IMPROVING** - constantly responsive to user suggestions for improvements and enhancements.

ManTech places program management support as a core function to drive value and results for ManTech's customers through ConstantView®. ManTech pushes financial data from mature DCAA-approved systems to provide up-to-date information with a few mouse clicks. ConstantView® customers can be confident that the information they receive is current, accurate, and complete.

Feature	Benefit	ConstantView® Location	PMBOK® Guide
Contract Summary Information	16 key contract data elements updated nightly from ManTech's contract management system presented along with comparison of contract value to funded amount down at the CLIN level.	InSight Contract Summary	Integration
Invoice Information	A drillable view into the entire history invoices submitted on the project.	InSight Expenses	Cost
Funds Expenditure	Provides a complete view into all expenses, open commitments, funds remaining, estimated daily burn rate, days funds remaining, % expended/ committed, and purchase requisitions at the contract, project, or activity level - refreshed nightly.	InSight Funds Expenditure	Cost
Sub-Project Financials	Provides the ability to both aggregate and view contract financial information configured with Customer and/or Project specific terminology (e.g., WBS, CLIN, CTN, SLIN) - refreshed nightly.	InSight Sub-Project Financials	Cost
Financial Snapshot	A graphical representation of all billed expenses by month to include outstanding open commitments and costs "to be billed" (in progress and outstanding).	InSight Financial Snapshot	Cost
Risk Management	An interactive risk register that enables program managers to easily identify, analyze, plan mitigation, and track progress to minimize risks probability and impact (burn down) - all presented in real time.	Risk Register	Risk
CDRL/Deliverables Management	ManTech's tool to track, report, and post all deliverables, which provides government customers timely access to deliverables and status reports - all presented in real time.	CDRL Tracking	Communication
Task Management	Allows team members to identify, log, and track tasks that come up during the course of a project.	Task Tracking	Time and Scope
Announcements	Promotes communication by allowing the project manager to post news, status, and other short bits of information he/she wants to share with the team.	Home & Communication	Communication
Supply Chain Management	A drillable view into a project's entire supply chain cycle.	InSight Supply Chain	Procurement
Staff Management	A full position, staff, and recruiting information system with fill rates and vacancy management	Resources	Human Resources
Quality Assessment Tool	Allows project and outside inspectors to verify quality of processes and work projects	Tools	Quality
Document Management	ManTech's tool for managing project documents utilizing a metadata structure and supporting sound configuration management.	Library	Communication
