Leading the Convergence of National Security and Technology™
WHO WE ARE

ManTech International Corporation is one of the leading providers of advanced technology services to the United States government.

We are a $3 billion public company that brings innovation, adaptability, and critical thinking to our work in defense, intelligence, diplomacy, law enforcement, science, administration, and other fields—across the nation and in many countries throughout the world.

We support more than 60 different government agencies under 1,000 active contracts, and we are now applying the lessons we have learned in the unforgiving arena of national security to help the private sector protect networks and critical information.

ManTech was founded in 1968 for the specific purpose of providing advanced technological services to the government. We began with a single contract with the U.S. Navy to develop war-gaming models for the submarine community. Over the years, our government’s technology needs have increased dramatically in scope and sophistication, and we have grown to meet that challenge.

Today, ManTech carries out its work through three operating groups:

- **Our Technical Services Group (TSG)** delivers business solutions to the Departments of Defense and State, providing expert technical and operational support worldwide.
- **Our Mission, Cyber, and Intelligence Solutions (MCIS)** group tackles some of the most challenging cyber security and intelligence problems facing our nation.
- **Our Emerging Markets Group (EMG)** provides technical program support for healthcare IT, space services and other federal civilian programs.

We are proud to include among the agencies we serve:

- Intelligence Community
- Department of Defense
- All branches of the Armed Forces
- Department of State
- Department of Homeland Security
- Department of Energy
- Department of Justice, including the FBI
- Space Community
- Other U.S. federal government customers
We have developed and refined our capabilities in anticipation of the rapid evolution of technology in our modern society, and we offer a broad range of discrete and integrated solutions. Our experience in the demanding field of national security has instilled in us a dedication to ethics and an unwavering commitment to quality, which we apply equally to all of our work with government and industry. Our solutions include:

- C4ISR Lifecycle
- Cyber Security
- Global Logistics
- Intelligence/Counterintelligence
- Information Technology
- Systems Engineering
- Test & Evaluation
- Mission Assurance
- Environmental, Range & Sustainability
- Healthcare

ManTech is one of the most trusted and respected providers of advanced technology, technical services, and security solutions in the United States.
TOP-NOTCH PROGRAM EXECUTION

C4ISR Lifecycle
All aspects of C4ISR systems and technology, from design through implementation and support, spanning ground, airborne, and space systems

Cyber Security
Full spectrum computer network operations, including the design, implementation, and operation of integrated systems, with a focus on cyber defense

Global Logistics
Full range of logistics and maintenance support for the U.S. military, at home and in theater, with the ability to deploy rapidly anywhere

Intelligence/Counterintelligence
Mission system engineering and support, SIGINT processing and dissemination, intelligence operations support, and collaboration tools and analysis to support the intelligence lifecycle

Information Technology
Full spectrum of services for information technology and information systems in a process-driven environment for government and the private sector

CAPABILITIES

• Ground, airborne, & space systems, including CI infrastructure
• Test and evaluation
• Telecommunications systems and elevated sensors
• Development, testing, and infusion of new technology
• Installation, training, and sustainment solutions

• Security Operations Centers (SOC)
• Computer Network Operations (CNO)
• Computer forensics and exploitation
• Counter-intelligence support
• Computer security training
• Penetration testing and network simulation
• Complete program protection and security
• Insider threat protection

• Operational readiness
• Streamline supply chain
• Global property management
• Maintenance sustainment
• Field and classroom training

• Mission support
• Signal processing
• Intel analysis
• Integration and test
• Deployment
• Sustainment linguistics

• Multi-layered infrastructure
• Real-time software applications
• Embedded software engineering
• Virtualization/cloud computing
• Biometrics and identity management
• Network and database administration
• Enterprise systems development
• Social media/collaboration environments
• Legacy systems support
• Rapid prototyping

PROGRAM EXAMPLES

U.S. Army, Base Expeditionary Targeting and Surveillance Systems-Combined (BETTS-C)
Protecting bases from attack requires precise advance information on threats coming from the ground and the air, and ManTech supports the BETTS-C for the Communications-Electronics Command (CECOM). BETTS-C is a combination of surveillance systems that significantly improves situational awareness and provides advanced protection for forward operating bases in hostile environments.

24/7 Security Operations Center (SOC) Support
The SOC is a critical element in ensuring the security and integrity of systems and electronic data. ManTech provides 24/7 monitoring in addition to intrusion detection monitoring, security engineering, incident identification and response, vulnerability and penetration testing, cyber threat analysis, and specialized training. Our solution framework is being replicated by many federal agencies. We provide SOC support to the Department of Agriculture Executive Office of U.S. Attorneys, Department of Justice, FBI Enterprise SOC, Naval Criminal Investigation Service, and Department of Defense.

U.S. Army, Global Field Support Services
ManTech has provided field support services to CECOM during military operations in hostile environments. Embedded with deployed combat units, our technicians install, integrate, and maintain secure satellite communications, IT systems, and electronic equipment. We quickly deploy ManTech personnel and equipment, worldwide, through 23 Army-owned support centers that we operate in six countries. ManTech developed C-Net, a secure global information system for DoD that allows its users to communicate and share information securely. The program’s secure applications include web conferencing, instant messaging, email, and document management tools.

Department of Defense, Counterintelligence Analytical Expertise
We provide embedded counterterrorism and counterintelligence analytical expertise to the U.S. Southern Command (SOUTHCOM) to skillfully research, corroborate, and determine key nodes in threat organizations. The tailored intelligence products produced by our analysts directly contribute to U.S. national security objectives and aid senior decision makers at SOUTHCOM to develop and carry out effective defense and policy strategies throughout Latin America and the Caribbean.

Department of State, Global Information Technology Modernization (GITM)
The GITM program is the first-ever integrated deployment of a Department-wide operating system throughout the State Department. The primary objective of the GITM program is to protect the Department’s information technology investments by deploying modernized systems at embassies and consulates worldwide. This initiative is a 4-year lifecycle model with several phases in the development process for each location. ManTech is responsible for modernizing the OpenNet/ClassNet Local Area Networks (LANs) in embassies, consulates, and domestic bureaus.

### Program Examples

#### U.S. Marine Corps, Tactical Systems Development and Integration

ManTech provides critical support to the development and integration of tactical systems for Marine Corps operating forces. In support of these efforts, we provide the subject matter expertise and the engineering environment necessary to quickly address difficult challenges.

#### Defense Information Systems Agency (DISA), Technical and Operations Support

ManTech has provided continuous technical and operational support to DISA’s Joint Interoperability Test Command (JITC) for more than 20 years. In that time, it has established itself as a joint testing center of excellence.

ManTech performs a broad range of services associated with the Command’s overall mission. These services include joint interoperability certification, operational T&E, and standards conformance testing on tactical and strategic C4ISR systems as well as NSS/ITS in support of military operations.

#### National Aeronautics and Space Administration (NASA), Mission Assurance Support Services

ManTech has played a vital role in the Space Shuttle Program as a part of the Kennedy Space Center’s (KSC) Safety and Mission Assurance Support Services contract. Our independent assessment team studied the electrostatic discharge procedures that were used on the space shuttle thermal blanket system, which protects the shuttle and crew during reentry. Although the Space Shuttle Program has ended, ManTech continues to support the Expendable Launch Vehicle Program and the International Space Station Program. We also work at KSC in support of the industrial and construction safety effort for the launch complex as well as metrology and IT requirements for the agency.

#### U.S. Navy, Tactical Training Theater Assessment Program (TAP)

Naval training and test ranges can require large areas and are often questioned for their potential impact on sensitive environments. In order to retain the ability to train personnel and test equipment, the Navy has developed an integrated program to assess the impact of its ranges and minimize impact on the environment, populated areas, and shipping and navigation. TAP is the Navy’s comprehensive program focused on environmental planning and sustainability of training and test ranges worldwide. ManTech delivers critical planning solutions to complex environmental and regulatory challenges in order to preserve and enhance the capabilities of Navy and Marine Corps ranges.

#### Healthcare Artifact and Image Management Solution (HAIMS), Military Health System (MHS)

ManTech designed and developed HAIMS using a commercial-off-the-shelf/government-off-the-shelf federated architecture to provide access to artifacts and images where needed, leveraging national interoperability standards to enable robust connectivity with existing and future systems. HAIMS ingests artifacts and images along with metadata information from MHS repositories worldwide, providing global access to MHS clinicians for search and retrieval of this data.
ManTech International Corporation

WHY CHOOSE MANTECH

ManTech is a highly respected provider of mission-critical technology services to the federal government. We bring to each undertaking a thorough command of technology, a culture of innovation and energy, and unquestioned integrity. These qualities have earned us the trust of our customers, the dedication of our employees, and the confidence of our investors.

Customer-driven

Our primary customer is the U.S. federal government, and we are extending our services increasingly to the commercial sector. The government relies on companies like ManTech to help it master the technology that keeps the nation safe and the government functioning efficiently. Managing intelligence data is critical to thwarting terrorism, fighting crime, and prevailing on the battlefield. And integrating huge amounts of data seamlessly and securely is critical to government programs, from healthcare to energy, to scientific research and space exploration. Businesses face many of the same security threats and administrative challenges as government, and we apply the expertise we have earned in the unforgiving world of national security to their needs.

Employee-centered

For approximately 10,000 highly skilled employees, ManTech is their employer of choice. In 2011, we added over 2,800 new hires—a record number—and we are proud that half of our new recruits are military veterans. We target candidates who have served in the military or as civilian experts in the Intelligence Community and Department of Defense, as well as experts in the technology disciplines.

Our partnership with the U.S. Army Reserve allows both organizations to identify young people interested in serving the nation and pursuing a career in mission-critical technologies.

A robust employee referral program helps us identify and recruit top-quality candidates, and our market competitive benefits and opportunities for professional development and growth continue to attract a stellar cadre of applicants. ManTech attracts superior professionals and emphasizes employee retention, and we have reduced our voluntary attrition rate in each of the last two years. We offer:

• Challenging assignments that support our country and fulfill our clients’ mission-critical needs
• Job security, coupled with competitive compensation and incentive plans
• Opportunities for professional growth and development through ManTech University, our in-house corporate learning and professional development arm
• A Career Mobility Program that helps identify new career opportunities for active employees
• Matched employee contributions to charities that provide relief, and engagement in events that promote wellness

As a premier provider of technology and engineering services and solutions to the federal government market, our strategy centers on growing our business strategically and profitably. The pillars of our strategy are:

• Expand within our national security base through a holistic approach that capitalizes on our global footprint and existing customer base to cross-sell our broad array of solutions
• Target high-growth segments of the market, in particular cyber security, information assurance, and C4ISR lifecycle support, and fast growing areas such as healthcare IT and border security
• Leverage our competitive advantages, including our experience on mission-critical technology solutions, our global presence, and the reputation ManTech has earned as a trusted partner to the intelligence and defense communities
• Pursue strategic acquisitions that broaden our domain expertise and service offerings, with particular focus on building our core offerings in national security and homeland defense; augmenting our cyber security capability; and diversifying into new government and commercial markets
• Maintain our relentless focus on efficiency by offering a strong value proposition to our customers that identifies ManTech as a cost-competitive provider that is well-positioned in the marketplace
• Attract and retain highly dedicated and cleared personnel to build the key managers and technical staff needed to meet our growth objectives
