Cyber Security Operations Center

ManTech's experts provide a balance of tools, technologies and the right people to safeguard your most important information resources.

- End Point Security
- Network Defense
- PKI Solutions
- Cross Domain Solutions
- Managed Attribution
- Information Assurance
- Vulnerability/Risk Mitigation
- Enterprise Auditing

Enterprise Situational Awareness and Proactive Cyber Defense

The cyber threats that exist today are:

- Sophisticated
- Dynamic
- Numerous

It is essential that organizations have the skills, processes, and tools needed to rapidly detect, deter, and disrupt increasingly complex network attacks in order to protect critical information, resources, and programs. To combat these threats, ManTech provides a variety of customizable Security Operations Center (SOC) solutions to ensure enterprise cyber security situational awareness and proactive cyber defense.

It's not if an attack will happen, it's when ... be ready.
