

DATA

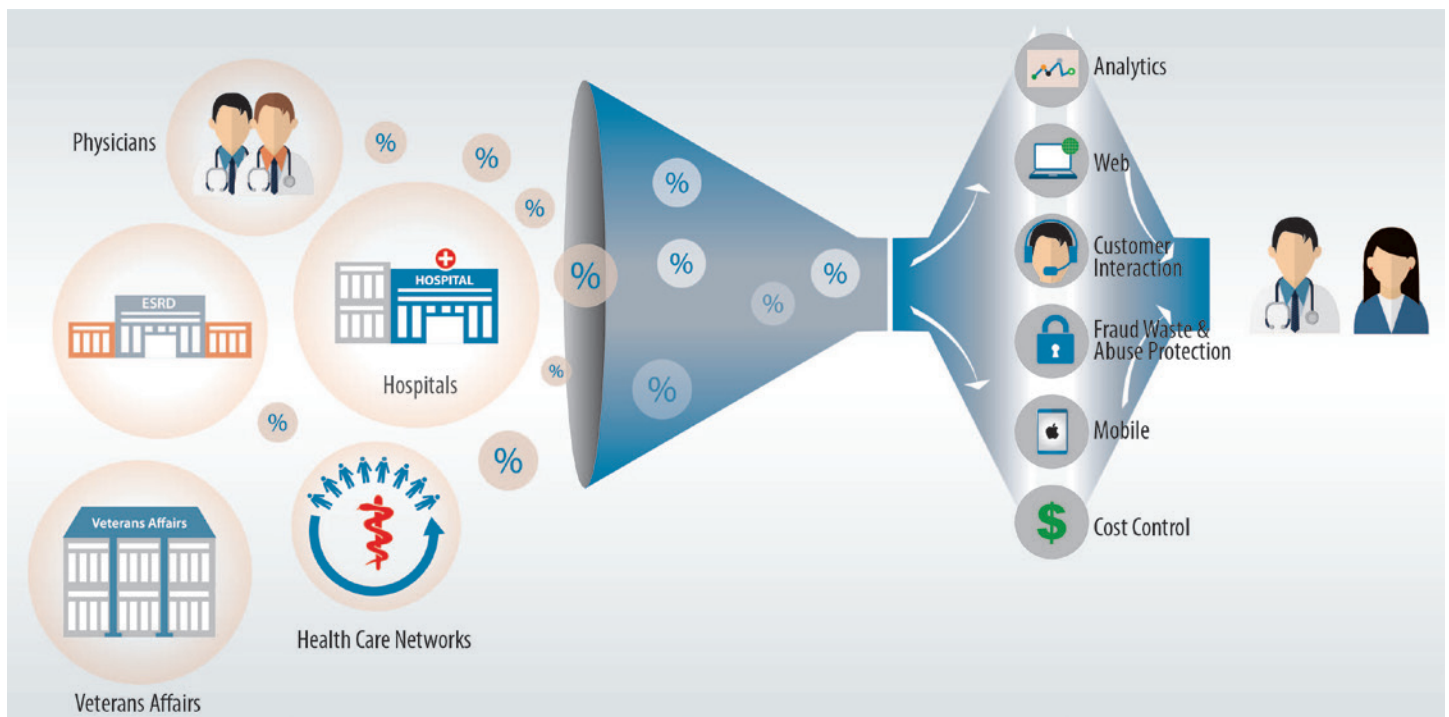

Collection & Analytics

Big Data Analytics

One of the greatest challenges presented by big data is to establish an integrated infrastructure that connects large volumes from different data sources across an organization. ManTech is committed to achieving next generation big data systems that deliver usable context. ManTech has established methodologies to connect previously unintegrated datasets and then use a streamlined infrastructure to deliver predictive analytics that turn data into actionable insights. These insights give our customers the ability to detect and act as needed, such as on waste and abuse within their organization. The ability to process and analyze structured and unstructured data results in a seamless transformation to a next generation big data infrastructure capable of delivering results across our customers' enterprise.

Capabilities

- Fraud waste and abuse protection
- Healthcare quality & management analysis
- Effectiveness and safety studies
- Business Intelligence
- Cost control
- Legacy data access
