

Data & AI Expert Support

Data & AI Sprint Teams and Subject Matter Experts

Overview

The successful implementation of Data and Artificial Intelligence (AI) requires leveraging advanced knowledge and skilled resources who possess a profound understanding of the technical foundations of AI enabling both optimal resource allocation and effective risk mitigation. ManTech's Data & AI Sprint Teams and Subject Matter Experts (SMEs) are well-equipped to meet these demands, bringing their expertise and capabilities to drive successful implementation. Our dedicated professionals, including engineers, scientists, consultants, and architects bring a wealth of knowledge and expertise to every project.

Sprint Team Offerings

ManTech's Data & AI Sprint Team offering provides access to experts available to support you throughout your Data & AI Project(s). To scale to various use cases, ManTech offers different sprint team options: **Slim, Broad, and Tiger-team**. We will collaborate with you to select or customize a team that aligns with your specific goals and requirements. Multiple instances of the same sprint team, or different sprint team options may be purchased as needed.

Timeline

Each option has a standard duration of two (2) weeks.

Options

- **Slim:** Modest labor requirements with a need for some specialized skillsets or experience.
- **Broad:** Efforts requiring substantial support needing specialized skills and experience in multiple areas of focus.
- **Tiger-team:** Support requiring key specialized skillsets with a niche focus for a discrete amount of time.

Key Outcome: ManTech's resources rapidly integrate and deliver results to meet your mission needs.

SME Support Capacity Offerings

ManTech's **Data & AI SME Support Capacity** offering provides expert support for any project, including all stages of our AI Turbocharger Methodology. ManTech will provide on-demand access to SMEs from **a variety of disciplines** (e.g., data science, domain expertise, machine learning, data engineering, Cloud / Infrastructure and Software engineering) to ensure best practices are followed throughout your use case. Data and AI Expertise areas include, Governance, software development, adoption enablement, and support for the Risk Management Framework Assessment and Authorization process. We offer a range of capacities to cater to your organization's unique requirements.

Timeline

Each option is available for a one (1) year term.

Options

25%, 50% or Full-time Capacity

Key Outcome: ManTech will ensure you have access to the expert resources you need as your project progresses throughout the engagement to drive mission success.

In business more than 55 years, ManTech excels in cognitive cyber, AI, data collection & analytics, enterprise IT, systems engineering and software application development solutions that support national and homeland security.
