

AcqCenter

Source Selection & Acquisition Management Solutions

Streamline the acquisition process.

The AcqCenter team at MANTECH develops and maintains a full offering of web-based solutions for government and private organizations to assist with all phases of the acquisition lifecycle.

DecisionPoint®

MANTECH's DecisionPoint® is a secure, web-based collaboration tool for government agency contract teams. It increases award schedule efficiency and reduces protest risk, successfully used in more than 950 government procurements.

An automated source selection evaluation tool, DecisionPoint® is both an intuitive workflow tool and a robust evaluation database.

DecisionPoint® helps enforce the evaluation team's source selection process. Evaluator strengths, weaknesses ratings and risks clearly link to the RFP evaluation criteria.

DecisionPoint® is designed to support federal agency program managers and contracting officers supervising evaluation teams during the source selection process to:

- Eliminate protests
- Increase evaluation efficiency
- Maximize online collaboration
- Provide comprehensive documentation
- Focus on evaluation quality over administration and logistics

OnTarget®

Based on DecisionPoint®, OnTarget® is a proposal development and review solution enabling government contractors to focus their proposals on the source selection criteria from the outset and to increase their contract win rate.

Officer: Officer A

Agencies of all sizes rely on the security, functionality, and efficiency of DecisionPoint® to support their source selection strategies and success. With DecisionPoint®, agency officials assess evaluation team progress and quality, while reducing cycle time to meet award schedules.

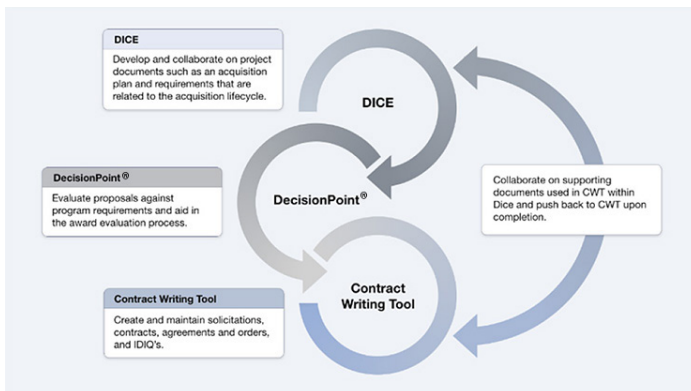

OnTarget®'s intuitive workflow maximizes collaboration and simplifies evaluations, allowing teams to review proposals in the same manner a government evaluator would.

Like DecisionPoint®, OnTarget® offers the ability to build rapid online consensus. The efficient consensus process facilitates collaboration between proposal teams. Consensus findings, progress, and status metrics posted in real-time and are interactively accessible.

PROIX® Suite

The PROIX® (Procurement Information Exchange) Suite is a comprehensive acquisition management lifecycle solution developed by MANTECH, designed to support contract professionals from pre-award to close-out, enabling agencies to simplify, optimize, and accelerate all phases of the procurement process.

The PROIX® Suite is comprised of:

DICE (Document Integrity, Collaboration, and Evaluation) is a web-based collaboration and workflow tool that enables dispersed teams to create and evaluate documents like rich text files, slide decks, and forms in real-time and export those documents into the Contract Writing Tool. It integrates directly with MANTECH's DecisionPoint®, allowing users to create and seamlessly export templates for use in source selection.

Contract Writing Tool, a secure web-based application for assisting Contracting Officers (COs) and their representatives with creating and managing acquisition documentation from solicitation, award, and period of performance to close-out. Supporting applications include the Content Manager, Reference Library, and Vendor Manager. The Contract Writing Tool includes:

- Contract Writing Tool (CWT) application used to create and manage contracting documents throughout the acquisition lifecycle.
- Content Manager web application to create and manage the content, rules and fill-in values for clauses and prescriptions from multiple regulations as well as page 2 statements for the automated creation of the Block 14 Continuation content of a contract modification or solicitation amendment.
- Reference Library web application used by CWT application users to lookup clauses and their prescriptions.
- Vendor Manager web application to manage information about vendors and a web service that can be used by a customer's existing vendor management system as alternative means to providing the CWT application with the vendor information.

In business more than 57 years, MANTECH excels in cognitive cyber, AI, data collection & analytics, enterprise IT, systems engineering and software application development solutions that support national and homeland security.
