

# Defense Sector

## Engineering the advantage for tactical edge

Mantech is a high-tech, high-end engineering partner with over 50 years of experience supporting mission-critical work across Defense, Intelligence, and Federal Civilian sectors. From the battlefield to the back office, we deliver solutions that help warfighters operate smarter, faster, and more securely. Every capability we bring to the table is driven by the realities of modern defense—from multi-domain operations to cyber resilience and digital transformation.

Our investments in Cognitive Cyber, Intelligent Engineering and Data and AI are guided by real mission need—today and over the horizon. We integrate talent, tools, and insights across disciplines to help defense missions outpace threats and seize the advantage. It's how we're **Always Advancing.**

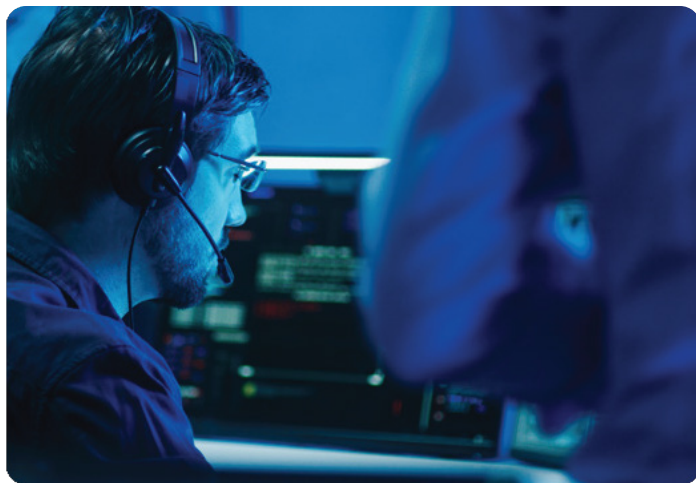

### Built for the challenges ahead

The Department of Defense is entering a new era of complexity—one shaped by near-peer competition and increasingly contested environments across every domain. Maintaining strategic advantage in this environment requires a force that is modern, agile, and capable of operating under constant pressure. Mantech is committed to supporting this mission by aligning advanced technologies with deep mission understanding—enabling the DoD to move faster, connect smarter, and recover stronger.

Our strategy is designed to ensure seamless operations across domains through secure cyber and mission IT capabilities that support resilient decision-making, even in degraded conditions. We are accelerating the delivery of

next-generation capabilities through a digital-first approach — designing, prototyping, and deploying innovations that match the speed and urgency of defense missions. From AI to quantum, autonomy to biotech, we are focused on integrating emerging technologies that redefine operational advantage.

With a footprint that spans air, land, sea, space, and cyberspace, Mantech is embedded at every level of the mission. As the nature of conflict continues to evolve, we remain focused on what matters most: giving our defense partners the technological and operational edge to not only meet the demands of today, but to shape the battlespaces of tomorrow.

## KEY SOLUTIONS AND SERVICES

Mantech delivers integrated capabilities to support the DoD across every domain. Purpose-built, field-proven, and ready to meet the mission as it evolves.

### C5ISR

We deliver mission-ready systems to the tactical edge with cloud-like computing, real-time analytics, and advanced security—empowering warfighters across disrupted environments, platforms, and domains.

### Systems Engineering

Our full life cycle engineering solutions support current and future platforms. Digital tools and processes help reduce cost and schedule while improving precision and performance.

### Full-Spectrum Cyber

We secure deployed systems, develop automation and tools, and provide cyber training environments, content, and platforms that boost readiness and strengthen enterprise defenses.

### Data Collection and Analytics

We build powerful ingest engines, scalable data storage, and fault-tolerant databases designed for unstructured data. Our models handle massive data sets, while our query engines and scoring analytics surface the intelligence that matters most.

### Enterprise IT

We manage, modernize, maintain, and secure complex global networks—delivering cloud migration, resilience, and performance at mission scale.

### Global Support, Logistics & Supply Chain Management

We deliver end-to-end logistics and maintenance support for U.S. military operations worldwide, designing systems that sustain combat and support platforms throughout their lifecycle.

### Software & Systems Development

We apply proven DevSecOps practices to build and improve software and networks. Whether commercial off-the-shelf or custom-built, our solutions boost security, usability, and operational readiness across the mission space.

### Training

We design mission-driven training that blends interactive courseware, simulations, game-based learning, and immersive tools—supporting everything from new equipment to field-level maintenance wherever the mission requires it.

### Intelligence Life Cycle Support

We deliver integrated intelligence solutions that uncover hidden patterns, deepen analysis, and clarify target behaviors. Our support helps teams make informed decisions that drive smarter action, faster.
