

Federal Civilian Sector

Driving secure digital transformation
across the mission landscape

Mantech is a high tech, high-end engineering partner with over 50 years of experience supporting mission-critical work across Defense, Intelligence, and Federal Civilian sectors. From modernizing legacy systems to defending complex digital ecosystems, we help agencies work smarter, faster and more effectively in service of their missions. Every capability we offer is rooted in the evolving challenges of government transformation — from data overload to cyber threats and rising operational demands.

Our investments in Cognitive Cyber, Intelligent Engineering and Data and AI are shaped by real-world agency needs — today and beyond. By integrating people, platforms, and insight, we partner with federal civilian agencies to strengthen security, accelerate performance and drive efficiencies. It's how we are **Always Advancing.**

Advancing civilian agencies to lead with digital

Federal Civilian agencies are navigating a rapidly shifting landscape marked by aging infrastructure, increasingly sophisticated cyber threats and an overwhelming surge in mission-critical data. The mandate is clear: modernize systems, elevate performance, reduce costs, and do it all while upholding the security and integrity of essential services. From veterans' care and public health to homeland security and critical infrastructure, the pressure to transform is constant — and growing.

Mantech is strategically positioned to lead that transformation. We partner with agencies across the entire modernization lifecycle, delivering secure, compliant solutions that translate mission need into measurable outcomes. This includes seamless cloud migration, the development of hybrid and multi-cloud environments, and the deployment of agile, automated approaches that increase speed to delivery while reducing operational friction.

Cybersecurity remains foundational to our approach. We strengthen civilian agency defenses with Zero Trust architectures, advanced insider threat detection, and integrated security operations that are proactive, not reactive. At the same time, we apply AI and advanced analytics to operationalize data—enabling faster decision-making, smarter services and more resilient mission execution.

By aligning mission priorities with technological innovation and delivering at scale, we equip our Federal Civilian partners to act with confidence, advance with purpose, and drive lasting impact.

KEY SOLUTIONS AND SERVICES

With deep technical expertise and a sharp focus on mission outcomes, Mantech delivers a full-spectrum of capabilities tailored to the evolving needs of Federal Civilian agencies.

» Full-Spectrum Cyber

- Continuous monitoring and information assurance
- Security Operations Center (SOC) & incident response
- Penetration testing and security assessments

» Analytics and Data Science

» Machine Learning

» Artificial Intelligence

» DevSecOps

» Application Development

- SAFe / agile
- User experience
- Testing enterprise IT
- Cloud migration
- Hybrid cloud / multi-cloud
- IT operations
- Help desk support
- Training
- Operations and maintenance
- Enterprise managed services

» Emerging Technology Insertion

» Global Logistics and Supply Chain Management

» Threat Intelligence and Analysis
