

Capability Statement 2026

MANTECH's Advanced Cyber Training Program is the leading training provider in Computer Network Operations (CNO) programming for U.S. Government personnel within the military and intelligence community and has been for over a decade. ACTP's core mission is to ensure our national safety and maintain our competitive edge in cyber warfare. Our comprehensive course portfolio caters to our diverse customer needs while providing personalized, flexible instruction coupled with hands-on labs to prepare students for cyber missions.

A Step Apart

ACTP doesn't just keep up with cyber training—we set the pace. Discover a few of the unique offerings that put us miles ahead:

Expert Instructors

- Our pool of instructors is hand-picked and thoroughly vetted based on their experience in real-world problem-solving. Their extensive experience and highest-level credentials enable them to facilitate deeper, more accurate conversations, training sessions, and insights. We provide practical training that goes beyond theory, preparing students for real-world scenarios with expert trainers who specialize in achieving success.

Adaptability to Cyberwar Dynamics

- Our instructors daily engage in frontline work, which ensures that our students learn the most relevant skills and tools. Training with ACTP means preparing for real-world scenarios with real-world experts who have the experience and knowledge to train for success.

Flexible Training Delivery

- All of our courses are taught in-person with options for remote instruction, self-paced, or hybrid. Our operations can be mobilized and delivered at the highest classification level. Our courses range from 3 days to 45 days training 10 to 100 students.

Continuous Improvement

- ACTP follows the Instructional Systems Development (ISD) process. We are committed to refining course content and enhancing the student experience. ACTP's history of successful sets us apart.

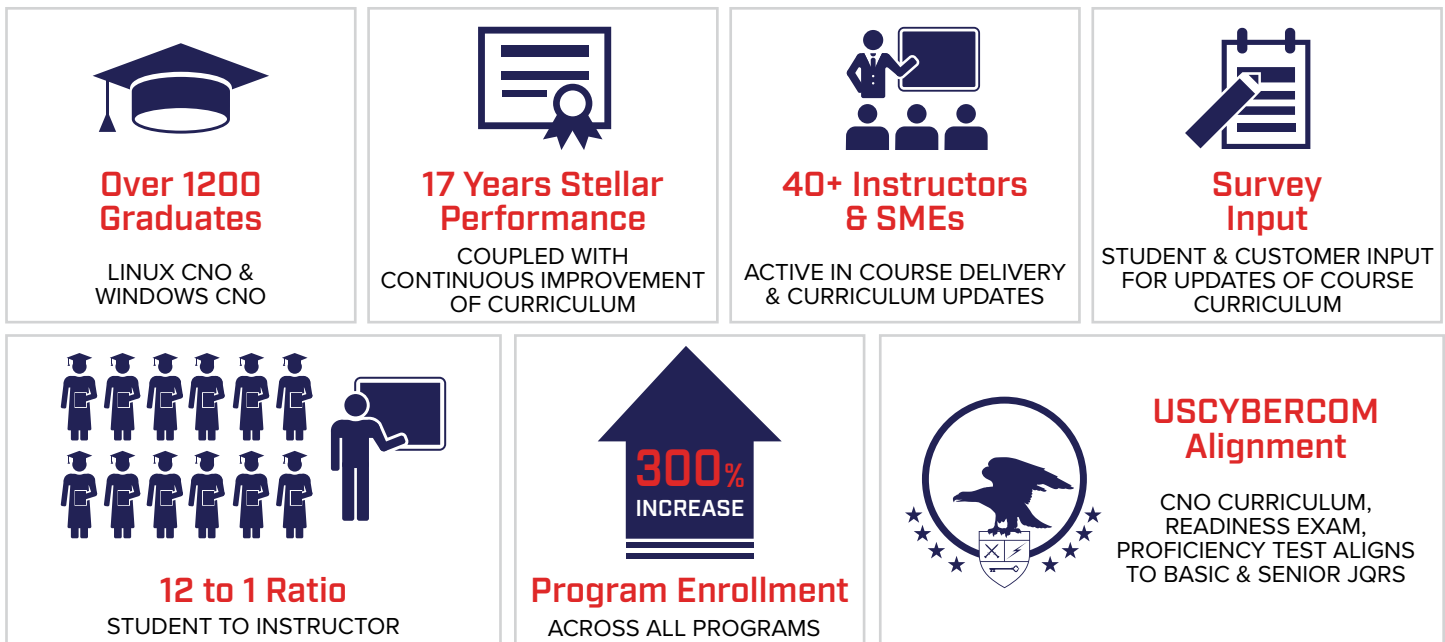

Capability

- Linux and Windows Programmer Course CNO Trainings which include Python, C, and x86-64 Assembly Programming, Embedded Systems (hardware hacking), Operating Systems, Secure Coding, Kernel Development, Networks, Android, and Reverse Engineering to name a few.
- Our delivery model seamlessly combines on-line, hybrid, and in-person personalized instruction and hands-on lab exercises with experienced SME's as our instructors.

Leading the Way

- **Readiness Exam** can be taken remotely and is designed to assess a student’s preparedness before enrolling in the 10-week CNO class. This two-hour baseline assessment provides predictive insights into the future performance of the student and ability to successfully complete the coursework.
- **Proficiency Test** allows participants to test-out of courses where they already have proven expertise; thereby, creating shorter pathways to CNO credentials. This flexibility streamlines learning pathways, reduces costs, and ensures efficient utilization of time and resources. This test should be taken at least three months before enrolling in CNO coursework to allow time for processing.
- **General Services Administration (GSA)** partnership streamlines enrollment and provides cost-effective pricing and seamless partnership.
- **Self-Paced Courses** provide flexibility for individuals who want to tailor their educational learning to their unique schedules. Starting with our Intro to ACTP five-day course and expanding to other courses, this service accommodates the need to balance work with educational learning as well as other commitments, leading to more personalized and effective learning outcomes. **COMING SOON**
- **Navigation Services** is a new bundled service that simplifies your investment and provides enhanced flexibility and value by combining on-site expert-led training, direct access to MANTECH SMEs, ongoing web-based or phone consultations, and flexible out-of-hours support into one cohesive package. This bundled approach not only streamlines operations but also ensures greater efficiency and predictability in your investment, ultimately maximizing your return on investment while fostering long-term success. **COMING SOON**
