MANTECH™
ALWAYS ADVANCING

ReadyRange™
From Certification to Combat-Ready: Transforming Your Cyber Workforce

Degrees and certifications are a great start, but the real question for leadership is: Can your team translate that knowledge into hands-on skills when the network is under fire? Organizations across the globe are struggling to hire, develop, and—most importantly—retain the skilled professionals needed to close a talent gap that leaves systems vulnerable.

MANTECH's ReadyRange™ (powered by ACRE™) pivots the focus from theoretical learning to operational mastery. By embracing the military's "train as you fight" philosophy, we ensure your defenders don't just know the "what," but have mastered the "how."

Outcomes That Matter: Beyond the Classroom

The goal of ReadyRange™ is to deliver measurable performance improvements that translate directly to on-the-job effectiveness.

Accelerated Onboarding: Get new hires up to speed rapidly by training them on your specific tools, software and procedures before they ever touch your live environment.

Tactical Proficiency: Bridge the gap between theory and practice by challenging defenders with realistic scenarios—ranging from basic troubleshooting to the "live-fire" attacks that keep leadership up at night.

Validated Decision-Making: Evaluate how your team handles incident response under pressure, allowing you to test and refine your risk strategies and contingency operations.

Career-Long Development: Create clear, role-based curriculums that allow advanced professionals to continuously enhance their skills and earn CompTIA CEUs.

Precision Training, Delivered Anywhere

We provide the architecture so you can focus on the results.

Metric-Driven Improvement: Capture performance and utilization metrics to demonstrate staff improvement over time and identify remaining capability gaps.

Flexible Access: Your team can log into the portal to access on-demand content and collaborative labs anytime, anywhere—ready in seconds.

Seamless Reporting: Training data integrates directly with your existing Learning Management System (LMS) to maintain an authoritative record of your team's readiness.

A Comprehensive Training Lifecycle

ReadyRange™ supports your workforce at every level of expertise, ensuring your human capital is your strongest defense.

Training Phase	Strategic Focus	Outcome
Foundational	Partner-led commercial and certification-oriented training.	Established baseline of technical knowledge.
Advanced	Custom training labs using your actual configurations and traffic patterns.	Tactical experience tailored to your specific environment.
Mastery	High-level capstone exercises and "a bad day at work" simulations.	Proven mastery and validated readiness for real-world threats.

Don't just hope your team is ready—know they are.
