DECISIONPOINT®

What is DecisionPoint?

DecisionPoint is a secure, web-based tool for government agencies that streamlines the source selection process. It is designed for federal program managers and contracting officers to manage evaluation teams, reduce protest risk, and improve award schedule efficiency.

DecisionPoint allows our customers to:

- Eliminate protests
- Increase evaluation efficiency
- Maximize online collaboration
- Provide comprehensive documentation
- Focus efforts on the quality and substance of the evaluation; not administration, process and logistics

DECISIONPOINT LICENSING PRICE LIST

BIDS BAA INFORMATION DELIVERY SYSTEM

What is BIDS?

BIDS is a comprehensive knowledge management solution designed for R&D organizations. This web-accessible application streamlines the entire information gathering and evaluation process, from disseminating calls for proposals (OTAs, BAAs, RFIs, SBIRs, etc.) to collecting submissions and conducting real-time online evaluations. BIDS eliminates paper-based inefficiencies, reduces administrative burden, and ensures the highest levels of information security.

BIDS allows our customers to:

- Post, gather and evaluate responses to OTAs, BAAs, RFIs
- Secure evaluation of submissions
- Integrate group evaluations for decision making

Manage your processes from anywhere with BIDS. This web-accessible platform gives you the tools to streamline workflows, improve collaboration, and make faster, more informed decisions with real-time data and reporting.

DOCUMENT DETECTIVE

What is Document Detective?

Document Detective is a mission-critical, standalone Windows-based desktop application designed to **prevent data spillage** and support the U.S. Government's rigorous requirement for **100% reliable human review** during Assured File Transfers (AFT), which involve transferring files from higher to lower classified networks or domains. Document Detective ensures safe, secure document transfers across classified security boundaries, while also identifying **Insider Threat indicators** and mitigating risks associated with unauthorized or malicious data leakage.

DOCUMENT DETECTIVE LICENSING PRICE LIST

The Document Detective software is licensed in **user packs**, which define the number of users who can access the software on a single machine, virtual machine or server. The minimum purchase is a 5-user pack.

Here are a few examples of how our user packs work:

- A **1x5-user pack** (one license, 5 users) allows up to five users to access the software on a single machine
- A **5x1-user pack** (5 licenses, 1 user each) allows one user to access the software on up to five different machines
- A **4x25-user pack** (4 licenses, 25 users each) gives you a total of 100 users across four different machines

SKU	Description	Pricing
DD-LIC-OFFICE	Document Detective OFFICE (5+ Users) Annual License Subscription <i>Includes:</i> <ul style="list-style-type: none"> ✓ Full access to all software features and updates ✓ Software upgrades at no additional cost ✓ Standard Support for up to two (2) Technical Points of Contact (TPOC) <i>Minimum license purchase quantity: 5 users</i>	\$305.00 <i>Per User</i> <i>Billed Annually</i>
DD-LIC-BUSINESS	Document Detective BUSINESS (50+ Users) Annual License Subscription <i>Includes:</i> <ul style="list-style-type: none"> ✓ Full access to all software features and updates ✓ Software upgrades at no additional cost ✓ Standard Support for up to three (3) Technical Points of Contact (TPOC) 	\$280.00 <i>Per User</i> <i>Billed Annually</i>
DD-LIC-ENT	Document Detective ENTERPRISE (100+ Users) Annual License Subscription <i>Includes:</i> <ul style="list-style-type: none"> ✓ Full access to all software features and updates ✓ Software upgrades at no additional cost ✓ Standard Support for up to four (4) Technical Points of Contact (TPOC) 	\$210.00 <i>Per User</i> <i>Billed Annually</i>

Standard Support consists of Tiers 0–2 support and does not include web-based meetings or phone assistance. Ticket response times may vary, and tickets from customers with Enhanced Support are prioritized, which could result in longer response times for standard support. For additional information regarding what Standard Support covers, [see page: 21](#)

DOCUMENT DETECTIVE ADD-ONS

SKU	Description	Pricing
DD-ADD-TPOC	Add-On: Single Additional TPOC One (1) additional Technical Point of Contact (TPOC) seat is available at a flat rate price per seat, billed annually. Each TPOC seat must be assigned to a named individual and cannot be a shared email address or generic mailbox. Proration is not available for the initial term or any subsequent terms of TPOC add-on seats. TPOC seat changes are available at any time but no more than once per quarter (every three (3) months). <i>Exceptions to this policy may be granted for special circumstances on a case-by-case basis.</i>	\$750.00 <i>Per Seat</i> <i>Billed Annually</i>
DD-ADD-TPOC-WG	Add-On: TPOC Workgroup Pack Three (3) Additional TPOCs at a 10% discount. Each TPOC seat must be assigned to a named individual and cannot be a shared email address or generic mailbox. Proration is not available for the initial term or any subsequent terms of TPOC add-on seats. TPOC seat changes are available at any time but no more than once per quarter (every three (3) months). <i>Exceptions to this policy may be granted for special circumstances on a case-by-case basis.</i>	\$2,025.00 <i>3 Seats</i> <i>Billed Annually</i>
DD-ADD-TPOC-ORG	Add-On: TPOC Organization Pack Five (5) Additional TPOCs at a 15% discount. Each TPOC seat must be assigned to a named individual and cannot be a shared email address or generic mailbox. Proration is not available for the initial term or any subsequent terms of TPOC add-on seats. TPOC seat changes are available at any time but no more than once per quarter (every three (3) months). <i>Exceptions to this policy may be granted for special circumstances on a case-by-case basis.</i>	\$3,188.00 <i>5 Seats</i> <i>Billed Annually</i>

Each organization can designate up to 10 add-on Technical Points of Contact (TPOCs) in addition to the two included with standard support. Please keep in mind that adding TPOCs expands your authorized user list; for priority ticketing and faster response times, an Enhanced Support subscription is required.

DOCUMENT DETECTIVE TRAINING

Enhance your team's skills and confidence with comprehensive training designed to secure file transfers and sanitize sensitive data.

Course Highlights:

- **Interactive Learning:** Practical exercises with the Document Detective software to reinforce key concepts.
- **Comprehensive Curriculum:**
 - Sanitizing documents for Assured File Transfers (AFTs)
 - Protecting against insider threats
 - Minimizing personal risk
 - Applying Document Detective best practices
- **Course Materials:** All necessary materials provided electronically
- **Certification:** Certificate awarded upon successful completion of the course and examination

DOCUMENT DETECTIVE TRAINING *CONTINUED*

SKU	Description	Pricing
NEW DD-WBT	ON-DEMAND WEB-BASED TRAINING (WBT) <ul style="list-style-type: none"> ● Duration: Self-Paced ● Enrollment Capacity: No student minimums or scheduling required ● Flexible Delivery: 100% Online and Self-Paced. Students can log in from any location to complete the Document Detective curriculum at their own speed (<i>Note: Access requires a smartphone for secure authentication via OKTA</i>) ● Certification: Official Document Detective Certificate of Completion 	\$695.00 <i>Per Student</i>
DD-ILT-VT	VIRTUAL INSTRUCTOR-LED TRAINING (ILT) <ul style="list-style-type: none"> ● Duration: 4 Hours ● Minimum Enrollment: 5 Students ● Maximum course capacity: 10 students ● Certification: Certificate awarded upon successful completion of the course and examination 	\$800.00 <i>Per Student</i>

On-Demand WBT Timeline & Access Policy:

1. **Period of Performance (PoP):** All training must be fully completed within 60 days of the purchase date. Access to the training course expires 60 days after the purchase date.
2. **10-Day Completion Window:** Once a student begins the course (initial login), they have 10 business days to finish the curriculum.

CRITICAL SCHEDULING NOTE: Because the course includes a 10-business-day access window, students must activate their training **no later than Day 50** of the Period of Performance to ensure they receive the full allotted time.

- **If you start on Day 55:** You will only have 5 days to complete the training.
 - **If you start on Day 59:** You will only have 1 day to complete the training.
 - **Result:** Any training time remaining after the 60-day expiration date will be forfeited.
3. **Access Extension (\$99 Fee):** If training is not completed within the 10-business-day window (and the 60-day PoP has not yet expired), students may purchase a 48-hour (2 business day) extension for a \$99 fee payable via credit card.
 - This request must be made within 14 business days of the original expiration date.
 - If the extension is not purchased within this grace period, the student must re-enroll at the full current rate

INFINISTRUCURE®

What is InfiniStructure?

InfiniStructure: Limitless IT Landscape is MANTECH-developed software that enables users to rapidly create and deploy a digital cyber environment, scaling any number of servers, whether a few or thousands, in minutes. InfiniStructure works on any hardware or cloud platform of choice. Customers may purchase InfiniStructure individually and use it on their own to build digital twins and create a testing, simulation and training environment. If you just want the tool to enable your own experts to work it, you can do so, the same as with a commercial service. The versatility of InfiniStructure can help virtually any customer protect their critical infrastructure via rapid deployment, development, testing and simulation to meet their most challenging needs.

BENEFITS:

- Rapid Deployment on Multiple Services
- User Friendly Visualization
- Drag and Drop Interface for Connectivity to Devices and Virtual Machine (VM) Templates

SENTRIS®

What is Sentris?

Sentris is a flexible security labeling and access control platform, developed by MANTECH for Microsoft Windows® environments that require a high degree of data security and confidentiality. Sentris provides end users with easy-to-use tools to label and secure content using common applications, such as Microsoft Word®, Excel®, PowerPoint® and SharePoint®. Sentris is unique in its capability to control access to data based on three criteria:

1. Who is accessing the information?
2. Where are they located?
3. What system are they using?

This innovative approach to attribute-based access control (ABAC) allows organizations to easily and efficiently manage access to information in complex, high-security environments where traditional access control mechanisms are ineffective and cumbersome. Sentris is designed to support key U.S. Government sharing initiatives to prevent inadvertent disclosure of restricted information and is equally customizable to meet the security requirements for virtually any organization.

MANTECH offers commercially-available annual subscription licenses in addition to optional Feature Packs, Add-Ons, Training and Enhanced Support Subscriptions for the Sentris Platform.

SENTRIS PLATFORM LICENSING PRICE LIST

MANTECH licenses the Sentris Platform Core Components on an annual subscription per named-user basis at the following price.

SKU	SENTRIS Core License	Pricing
SEN-LIC-CORE	<p>Includes:</p> <ul style="list-style-type: none"> ✓ Sentris Platform Server <ul style="list-style-type: none"> ◆ The core server component for the Sentris Platform, providing centralized mechanisms for authenticating users within Sentris and specifying the classification metadata that each user is authorized to process. ✓ Sentris Platform Client <ul style="list-style-type: none"> ◆ An essential prerequisite installed on client and server machines, enabling Sentris applications to communicate with the Platform Server. ✓ Sentris Administration Tool <ul style="list-style-type: none"> ◆ The management console for administrators to configure the Sentris environment, including user permissions, network and facility certifications, and classification markings ✓ Sentris Labeling for Microsoft Office <ul style="list-style-type: none"> ◆ A Microsoft Office add-in that facilitates document classification and works with other Sentris components to control access to Sentris-marked files. (Supports common Microsoft applications such as Word, Excel, PowerPoint, Outlook, and Project). ✓ Sentris ADP Synchronization Service <ul style="list-style-type: none"> ◆ Automates user management by synchronizing security principals (users, facilities, networks) from an external system with Sentris. ✓ Sentris API Documentation <ul style="list-style-type: none"> ◆ A technical guide for .NET developers for programmatically interacting with the Sentris API, provided as a .chm file with C# examples for core functions such as managing marking data, displaying dialogs, formatting labels, searching for sensitive words, and handling coversheets. ✓ Sentris Standard Support for up to two (2) Technical Points of Contact (TPOCs) per organization. <p><i>Minimum license purchase quantity: 25 users</i></p>	<p>\$182.00</p> <p><i>Per User</i></p> <p><i>Billed Annually</i></p>

Standard Support consists of Tiers 0–2 support and does not include web-based meetings or phone assistance. Ticket response times may vary, and tickets from customers with Enhanced Support are prioritized, which could result in longer response times for standard support. For additional information regarding what Standard Support covers, [see page: 21](#)

SENTRIS FEATURE PACKS

Sentris Feature Packs are subject to a one-time purchase fee, provided the Sentris Core annual license subscription remains active and in good standing. Should the Sentris Core annual license subscription lapse or fail to renew, all previously purchased Feature Packs must be repurchased alongside the new Sentris Core license at the prevailing rates as listed in the posted IT Commercial Price List at the time of renewal.

SKU	Description	Pricing
SEN-FP-SP	Sentris Protection for Microsoft SharePoint Sentris Protection for SharePoint integrates the Sentris labeling and access control platform with Microsoft SharePoint Server to safeguard classified data, protecting sites, lists, and items while preserving SharePoint's collaborative functionality.	\$66,150.00 <i>Up to 10,000 users</i>

SENTRIS ENHANCED SUPPORT

Enhanced Support Subscriptions apply solely to the **named Sentris Organization** in the support agreement. Support is non-transferable to affiliated entities, other organizations, or projects. All support requests must come from the Sentris Organization's designated Technical Points of Contact (TPOCs) via the Sentris Support Portal on Zendesk.

SKU	Description	Pricing
SEN-ESS-SILVER	<p>SILVER ENHANCED SUPPORT</p> <p>Tier 3+ SILVER Enhanced Support Subscription provides troubleshooting and analysis of Sentris deployments in an enterprise environment.</p> <p>Includes:</p> <ul style="list-style-type: none"> ✓ *NEW* Includes Sentris Toolkit Feature Pack ✓ Priority ticketing support with one (1) business day response time for up to three (3) Technical Points of Contact (TPOC) ✓ Onsite Option: One (1) 3-consecutive-day on-site engagement for routine Sentris health checks and troubleshooting ✓ Training Option: Up to three (3) registrations for the Sentris Certified Engineer Training - Virtual: Individual Enrollment (\$10,500.00 value) ✓ May schedule up to two (2) 45-minute web-based meetings or phone calls per month throughout the contract period to address any questions or concerns - <i>unused sessions expire monthly, do not rollover and must be scheduled with five (5) business days advance notice</i> ✓ Scheduled support outside of standard business hours available with ten (10) business days' advance notice 	<p>\$95,000.00</p> <p><i>Annually</i></p>
SEN-ESS-GOLD	<p>GOLD ENHANCED SUPPORT</p> <p>Tier 3+ GOLD Enhanced Support Subscription provides troubleshooting and analysis of Sentris deployments in an enterprise environment.</p> <p>Includes:</p> <ul style="list-style-type: none"> ✓ Includes Sentris Toolkit Feature Pack ✓ Priority ticketing support with four (4) business hour response time for up to four (4) Technical Points of Contact (TPOC) ✓ Onsite Option: Four (4) 3-consecutive-day on-site engagements for routine Sentris health checks and troubleshooting ✓ Training Swap Option: A maximum of one (1) total on-site engagement can be exchanged for one (1) 5-day virtual training session for up to 10 students ✓ *NEW* Training Option: Up to three (3) registrations for the Sentris Certified Engineer Training - Virtual: Individual Enrollment (\$10,500.00 value) ✓ May schedule up to two (2) 45-minute web-based meetings or phone calls per month throughout the contract period to address any questions or concerns - <i>unused sessions expire monthly, do not rollover and must be scheduled with five (5) business days advance notice</i> ✓ Scheduled support outside of standard business hours available with ten (10) business days' advance notice 	<p>\$175,000.00</p> <p><i>Annually</i></p>

SEN-ESS-PLATINUM	<p>PLATINUM ENHANCED SUPPORT</p> <p>Tier 3+ PLATINUM Enhanced Support Subscription provides troubleshooting and analysis of Sentris deployments in an enterprise environment.</p> <p>Includes:</p> <ul style="list-style-type: none"> ✓ Includes Sentris Toolkit Feature Pack ✓ Priority ticketing support with two (2) business hour response time for up to four (4) Technical Points of Contact (TPOC) ✓ Onsite Option: Eight (8) 3-consecutive-day on-site engagements for routine Sentris health checks and troubleshooting ✓ Training Swap Option: A maximum of one (1) total on-site engagement can be exchanged for one (1) 5-day virtual training session for up to 10 students ✓ *NEW* Training Option: Up to three (3) registrations for the Sentris Certified Engineer Training - Virtual: Individual Enrollment (\$10,500.00 value) ✓ May schedule up to two (2) 45-minute web-based meetings or phone calls per month throughout the contract period to address any questions or concerns - <i>unused sessions expire monthly, do not rollover and must be scheduled with five (5) business days advance notice</i> ✓ Scheduled support outside of standard business hours available with five (5) business days' advance notice 	<p>\$295,000.00</p> <p><i>Annually</i></p>

This section outlines the terms for Enhanced Support plans that include on-site engagements. On-site engagements are scheduled for three (3) consecutive business days, with travel days typically on Mondays and Fridays. These engagements are non-cumulative and at the customer's option. All on-site visits and after-hours/weekend support are contingent on resource availability and must be scheduled within the contract's performance period. To guarantee resource availability, the customer must submit scheduling requests at least sixty (60) calendar days in advance.

Tier 3+ Enhanced Support Subscriptions are exclusively for Sentris-related issue resolution. This subscription expressly excludes support for architecture design, enterprise system configurations, or any issues related to the broader IT environment.

Purchase of an Annual Subscription of Sentris Enhanced Support or Training at any level, as indicated above, is subject to the terms and conditions of the End User License Agreement ("EULA") between MANTECH and Licensee; provided, that any inconsistency, conflict or ambiguity between the EULA and the Service Description herein shall be resolved by giving precedence to the Service Description.

Payment & Pricing Information: *All prices are subject to change without prior notice. MANTECH reserves the right to adjust pricing in accordance with prevailing industry standards and market trends. Annual price adjustments will include a minimum increase of 3% for services and 5% for software to ensure the continued delivery of high-quality products and support. For additional information, [see page: 22](#).*

SUPPORT DEFINITIONS COMMERCIAL SOFTWARE & SERVICES

MANTECH is committed to providing exceptional support for all our software offerings. Our tiered support model ensures you receive the appropriate level of assistance, from self-service resources to premium support options.

Standard Support (Tiers 0-2)

All MANTECH software licenses include comprehensive standard support at no additional cost. This provides a baseline level of assistance for efficient issue resolution and optimal software utilization.

Support Hours: Standard support hours are 9:00 AM to 5:00 PM Eastern Standard Time (EST), Monday through Friday, excluding U.S. federal holidays.

- **Tier 0: Self-Service Support:** 24/7 access to the Support Portal and Knowledge Base, featuring extensive technical documentation, articles, and solutions to common issues.
- **Tier 1: Assisted Support:** Submit support requests through the Support Portal on Zendesk and receive prompt assistance from our support team for basic troubleshooting and guidance.
- **Tier 2: Incident Resolution:** Escalate complex issues or potential software bugs to our expert engineering team for in-depth analysis and resolution.

Enhanced Support (Tier 3+)

For organizations requiring enhanced levels of support, we offer Tier 3+ Enhanced Support Subscriptions. These subscriptions are purchased separately as an add-on to your annual software license.

Tier 3+ Benefits:

- **Faster Response Times:** Receive priority ticketing attention with advanced placement in the support queue.
- **Expert Guidance:** Improve operational efficiency with advice and recommendations from our expert technical engineers.
- **Extended Support Hours:** Get the support you need when you need it with coverage beyond standard business hours, including weekends and evenings. *Available with select Enhanced Support subscriptions.*
- **On-Site Support:** Our engineers provide expert assistance at your location. *Available with select Enhanced Support subscriptions.*
- **Monthly Support:** Schedule monthly phone consultations and web-based meetings to discuss performance, address potential issues, and plan for future needs. *Available with select Enhanced Support subscriptions.*
- **Training:** Schedule virtual training sessions to enhance your team's software proficiency. *Available with select Enhanced Support subscriptions.*

Important Notes:

- Specific features and benefits within Enhanced Support subscriptions vary by software offering. Refer to the detailed plan descriptions for each software product.
- Contact our sales team to discuss your Enhanced Support requirements and receive a personalized quote.

PAYMENT & PRICING INFORMATION COMMERCIAL SOFTWARE & SERVICES

MANTECH accepts the following payment methods:

- **Purchase Orders:** For approved customers
- **Credit Cards:** Required for all purchases under \$5,000

Payment by credit card is due in full prior to the delivery of any product or service. There is no transaction fee for purchases made via credit card.

Credit card payments can be submitted through our secure portal:

<https://www.payerexpress.com/ebp/MANTECH/Login>

After submitting your payment, a receipt will be generated. To avoid delays, you must save a PDF copy of this receipt and email it to Commercial.Services@MANTECH.com. Order processing will not begin until proof of payment is received. ***Any delay in providing payment confirmation may result in a delay in processing your order.***

All prices are subject to change without prior notice. MANTECH reserves the right to adjust pricing in accordance with prevailing industry standards and market trends. Annual price adjustments will include a minimum increase of 3% for services and 5% for software to ensure the continued delivery of high-quality products and support.

For the most up-to-date pricing information, please refer to the latest version of the IT Commercial Price List available at www.MANTECH.com/products.

Commercial Software inquiries and quote requests, please contact: Commercial.Services@MANTECH.com

Custom academia discounts, referral and multi-year discounts available upon request.

The Intelligent Solution Engineering Engagements (iSEE)

What and Why?

MANTECH's iSEE service delivers custom-engineered solutions for complex challenges, rapidly prototyping concepts for critical missions. Integrating advanced technology, iSEE boosts operational efficiency and mission effectiveness through an outcomes-focused approach. This prioritizes efficient resource use via flexible engagement and immediate access to experts, ensuring effective, aligned solutions through collaboration, model-based engineering, and innovation. MANTECH bridges technology and mission practicality by rethinking operator/user engagement models, incorporating human-centered design, model-based engineering, and innovative systems-thinking. Tailored engagement enables informed, adaptive decisions, accelerating concept-to-capability transition while aligning with long-term mission goals.

Organizations struggle to rapidly design and implement solutions for complex technological, operational, and organizational problems amidst dynamic global influences. This is due to evolving mission requirements conflicting with structured procurement processes. Managers, engineers, and expert teams are overwhelmed by new technologies, legacy systems, and stakeholder demands, making it difficult to balance innovation, compliance, and risk, and delaying the integration of new capabilities. This creates a gap between mission needs and timely, effective technological solutions, leading to potential failure if user needs, mission context, and technological feasibility are not aligned.

Benefits:

- **Rapid and Responsive Solutions:** Boosts operational efficiency by swiftly deploying technologies for emerging mission needs, reducing wait times and enhancing readiness.
- **Outcome-Centric Solutions:** Our personalized service ensures effective, tailored solutions by focusing on operator needs, mission objectives, and desired outcomes.
- **Easy Access to Technical Expertise:** Organizations gain access to our pool of skilled SMEs across our practice's service lines, eliminating recruiting and retention costs.

Deliverables:

- **Solution Scope:** Defines the problem, mission context, objectives, and desired outcomes. Establishes boundaries, success criteria, and high-level solution vision through artifacts like the Problem Statement and Solution Canvases.
- **Solution Design:** Describes the conceptual and evolved architecture, models, interfaces, and system behaviors that define how the solution functions and satisfies mission and performance requirements.
- **Solution Prototype:** Demonstrates the solution's feasibility and effectiveness through a functional virtual or physical model that validates design assumptions, performance, and user interaction against desired outcomes.
- **Solution Production-Ready Package:** Provides finalized design data, configuration documentation, and a Technical Data Package (TDP) enabling transition to manufacturing, integration, or deployment as a validated, production-ready solution.

Feature	Benefit
<p>Systematic Innovation Discovery: Innovative solutions for complex mission challenges. Using systematically and securely curated mission-relevant innovations from the global innovation ecosystem and refining solutions to be fit for purpose.</p>	<p>Mission-Aligned Innovation: Organizations gain innovative solutions that directly address their unique needs and challenges, ensuring relevance and effectiveness within their specific operational context and requirements.</p>
<p>Model-Driven Problem Solving: uses Model-Based Engineering (MBE) to transform complex challenges into shared digital environments where experts rapidly model, test, and refine solutions—enabling faster, smarter collaboration across within a digital services ecosystem (DSE).</p>	<p>Adaptive & Cost Effective Solutions: Organizations gain the flexibility to visualize, evaluate, and refine solutions digitally; thus, accelerating engineering, improving decisions, and ensuring mission alignment before committing major resources to development or testing.</p>
<p>Mission-Adaptive Prototyping: Rapidly develop and validate adaptable, mission-specific prototypes through contextual analysis and agile engineering, ensuring swift, evidence-based results that are easy to change to meet evolving needs.</p>	<p>Increased Mission Readiness: Gain rapid access to validated, mission-ready technologies that reduce risk, enhance agility, and ensure solutions remain relevant in dynamic mission environments.</p>

MANTECH'S INTELLIGENT SOLUTION ENGINEERING ENGAGEMENTS (ISEE) PRICING

Support Package	Description	Cost
<p>iSEE Solution Scoping 1-D Studio™</p>	<p>iSEE Solution Scoping 1-Day Studio™ rapidly aligns stakeholders around a shared understanding of the problem, mission context, and desired solution outcomes. Through focused collaboration, the team defines and visualizes the challenge using a Problem Statement Canvas and a Solution Canvas, establishing the foundation for follow-on solution development. The engagement includes 5 days of pre-work, a 1-day collaborative session, and 5 days of post-work synthesis and refinement to ensure actionable clarity.</p>	<p style="text-align: center;">\$92,000 1 day</p>
<p>iSEE Conceptual Solution Design 3-D Studio™</p>	<p>iSEE Conceptual Solution Design 3-Day Studio™ brings stakeholders together to refine the problem, align on vision, and define desired solution outcomes. Through collaborative modeling and structured analysis, the team produces a Problem Statement Canvas, Solution Canvas, and Conceptual Design with Abstract Models. The effort includes two weeks of pre-work for data and context gathering, three days of focused collaboration, and two weeks of post-work to evolve the models and simulations and finalize conceptual design artifacts.</p>	<p style="text-align: center;">\$215,000 3 day</p>
<p>iSEE Solution Prototyping 5-D Studio™</p>	<p>iSEE Solution Prototyping 5-Day Studio™ validates that the proposed solution meets mission expectations and delivers the desired outcomes. Using an evolved design and prototype, the team demonstrates how the solution resolves the characterized problem. Deliverables include a Problem Statement Canvas, Solution Canvas, Solution Design with Evolved Models, and a Virtual or Physical Functional Prototype. The effort spans three weeks of pre-work, five days of collaboration, and five weeks of post-work for refinement of the designs, complete the prototype, and conduct the demonstration.</p>	<p style="text-align: center;">\$600,000 5 day</p>

Model Governance Support Services

What is the Model Governance Support Service?

For customers who want to understand and build trust in the models within their ecosystem, the model governance support service provides detailed direction to establish an organization's governance system. Our solution is a structured framework to ensure that models fulfill objectives and perform as intended while remaining trackable and traceable throughout the system life cycle.

Model Governance Support Services allows our clients to:

- Design a holistic approach to model governance to improve performance and security
- Track the inventory and activity of the various models used
- Implement policies for how, when, and why to use models
- Enhance trust in model-based artifacts
- Right-size models to purpose and intended outcome
- Provide transparency to model development efforts
- Establish consistent processes which are also scalable and tailorable

MODEL GOVERNANCE SUPPORT SERVICE PRICING

Tier	Description	Price
Basic Support	<p>The Basic Support package initiates the client's engagement with the MANTECH Model Governance Framework through a comprehensive examination of Governance objectives and requirements, thereby ensuring the client's team is well-equipped for the successful adoption and implementation of the provided guidance.</p> <p>For a six-month period, MANTECH Subject Matter Experts (SMEs) are available to facilitate consultations regarding the formulation of the client's Governance plan, including the scoping of models and digital threads. This six-month engagement concludes with a formal closing engagement, designed to ensure the operationalization of the developed governance model and to incorporate any necessary refinements or feedback for subsequent releases of the model governance guide, to which the client will retain access.</p> <p>Includes:</p> <ul style="list-style-type: none"> • 3 onsite engagements • 6 month of SME quarter time support • Access and updates to Model Governance Guide and Templates 	\$255,000/yr
Enhanced Support	<p>Enhanced Support incorporates Basic Support and augments Subject Matter Expert (SME) support to half-time allocation.</p> <p>Includes:</p> <ul style="list-style-type: none"> • 3 onsite engagements • 6 month of SME half time support • Access and updates to Model Governance Guide and Templates 	\$375,000/yr

MODEL GOVERNANCE SUPPORT SERVICE PRICING *Continued*

Tier	Description	Price
Premier Support	<p>Premier support encompasses basic support while providing a dedicated Subject Matter Expert (SME) to lead the development of the client's governance model and strategic plan over a six-month engagement. This service further includes an additional on-site session to refine and finalize the initial release of the governance plan and model, facilitating its implementation by the client's team.</p> <p>Includes:</p> <ul style="list-style-type: none">• 4 onsite engagements• 6 month of a dedicated SME full time support• Access and updates to Model Governance Guide and Templates	\$658,000/yr
Additional Support	Additional support services requested will be invoiced at the applicable Subject Matter Expert Commercial Hourly Rate (Level V through VP).	\$395 - \$575

Cyber Physical Simulation Twinning eNvironment (CPSTN)

What is CPSTN?

CPSTN is a cutting-edge cyber physical framework designed to meet the needs of programs and organizations requiring advanced digital environments for analysis, visualization, and twinning. CPSTN, pronounced "Capstone," stands out as a platform-agnostic solution that holistically models and analyzes all domains, setting it apart from other digital twin offerings. Developed by MANTECH, CPSTN accelerates acquisition timelines for complex, multi-dimensional problems while enhancing product effectiveness before deployment. With the flexibility to operate on any customer-preferred platform, CPSTN offers unparalleled customization and reliability through scripted deployments, ensuring a seamless integration into existing or on-premises environments.

CPSTN allows our clients to:

- Accelerate acquisition timelines for complex and multi-dimensional problems.
- Improve the effectiveness of products before deployment.
- Model and analyze all domains holistically within a platform-agnostic environment.
- Customize their digital environments to suit a variety of needs through scripted deployments.
- Integrate and evaluate models, software, and hardware to assess their contribution to mission success.
- Understand and mitigate risks among system interfaces, components, and software vulnerabilities.
- Support virtual training environments for both remote and bandwidth-constrained users to improve operator skills and recognition of cyber threats.

Feature	Benefit
Single environment for all domains	Comprehensive modeling and analysis, unlike solutions focusing only on cyber or physical twins.
Tool-agnostic data sharing using MANTECH's scripting approach, hypervisor, and SysML models	Seamless integration with existing systems without requiring proprietary solutions.
TCP Bridge communications software	Facilitates integration and data exchange of various hardware with CPSTN.
Unfettered access to hardware in the loop (HITL) from different locations	Reduces integration time and schedule risk through remote hardware sharing.
(HITL) from different locations	through remote hardware sharing.
Scripted deployments	Ensures customization and reliability, tailored to meet diverse customer needs.
Cloud-agnostic and on-premises hardware support	Flexibility to operate in preferred environments without needing to change existing setups.

Feature	Benefit
Accelerates acquisition timelines	Speeds up the process for complex, multi-dimensional problems.
Improves product effectiveness before deployment	Enhances the quality and performance of products through advanced analysis and visualization.
Supports virtual training environments	Provides operationally-relevant training for remote and bandwidth-constrained users.
Comprehensive risk and vulnerability analysis	Helps customers understand and mitigate risks among system interfaces, components, and software.

CPSTN LICENSING PRICE LIST

CPSTN Option Name	Description	License Cost
CPSTN - Network	Creates a digital or virtual twin of an IT network and models all the key details of the physical network, including network elements, their configurations, connectivity, and dynamic behaviors (includes NE-ONE 4-1G Virtual Appliance)	\$192,000/yr
CPSTN - Air	Provides a hyper-realistic, integrated environment for modeling and analyzing air platforms—which can include manned aircraft, unmanned aerial systems (UAS), and associated command, control, and communication systems. The core principle is the creation of a Digital/Virtual Twin that links the platform's engineering and performance models with its essential cyber and IT networks. (Includes STK Premium Air and NE-ONE 4-1G Virtual Appliance)	\$270,000/yr
CPSTN - Space	Creates a hyper-realistic, digital/virtual twin that combines the physical performance of a system with its cyber and IT environment. For space platform simulation and analysis, CPSTN is used to create a comprehensive virtual replica of the spacecraft, its subsystems, and the ground-based command and control (C2) network it relies on. (Includes STK Premium Space and NE-ONE 4-1G Virtual Appliance)	\$270,000/yr
CPSTN - Multi-domain	Addresses the complexity of Multi-Domain Operations (MDO), which involves the synchronized use of capabilities across air, land, sea, space, and cyber domains. With CPSTN, we don't just model individual platforms, but the entire System of Systems (SoS) across all domains. (Includes STK Enterprise and NE-ONE 4-1G Virtual Appliance)	\$280,000/yr

Additional Network & Analysis Licensing Options

Item	Description	Cost
Additional STK Premium License	Available in Air and Space variants, STK Premium enables advanced analytical, optimization, and modeling capabilities for complex mission engineering. It includes tools for high-fidelity aircraft/satellite performance modeling, parallel computing, and specialized modules for maneuvering and payload analysis.	\$77,000/seat
Additional STK Enterprise License	A comprehensive Ansys software suite for digital mission engineering and systems analysis, combining all STK Pro and Premium capabilities with advanced data management for multi-domain, distributed teams. It provides a physics-based, 3D environment to model, simulate, and analyze complex air, sea, land, and space systems.	\$88,000/seat
4-10G NE-ONE	A higher-performing virtual appliance that implements software-based network emulation designed to simulate complex network conditions (latency, loss, congestion) for testing application performance, featuring 4x10Gbps and 2x1Gbps emulation ports with 128 soft ports.	\$126,000/yr
NE-ONE Defense Bundle	This option provides for unlimited soft ports and network objects giving clients complete flexibility. It also adds the Dynamic Routing pack for real-time path discovery and network topology changes or link failures.	\$133,000/yr

CPSTN SUPPORT SERVICES PRICING

Support Package	Description	Cost	Additional Cost / Hour
Base Support	Provides ticketing support within 24 hours. Customers may schedule 1-hour web-based meetings or phone calls each month. Supports delivery of software patches throughout the subscription period.	\$26,500/yr	\$395
Priority Support	Includes everything in the Base support but also provides enhanced troubleshooting and analysis of Solution deployments. Supports analysis of Solution configurations and errors. Subscription includes: email and phone support; response time within 8 business hours. Scheduling of support after hours requires 2-week advanced notice.	\$65,000/yr	\$395
Elite Support	Provides enhanced troubleshooting and analysis of Solution deployments. Supports analysis of Solution configurations and errors. Subscription includes: email and phone support; response time within 4 business hours. Option for annual onsite visit for troubleshooting and system optimization.	\$94,000/yr	\$395
Custom Adaptor Development	Creates custom adaptor to a new simulation framework outside of ANSYS STK; modify our communications service to support customer communication protocols; or tailor our Orchestration service to ingest new data types to create new SDIs.	<i>Request Price</i>	N/A

Obsolescence Management Service

What and Why?

Aging systems face growing risks from component and software obsolescence. Without timely insight, programs risk increased sustainment costs, operational down-time, and critical failures. Our service delivers real-time insights into part and system obsolescence, identifiers at-risk components, and recommends suitable replacements for proactive sustainment decisions and lifecycle planning.

Our service leverages MANTECH's Smart Portfolio Solution (MSPS) which includes advanced AI techniques to aggregate and analyze obsolescence data from public sources as well as customer-fed data such as bill of materials (BOMs) and other data sources as requested. This facilitates the proactive identification of components and systems facing impending or current end-of-life (EOL) status.

Benefits:

- **Cost-Efficient Sustainment:** Optimize logistics and replacement sourcing for impacted systems.
- **Reduce Downtime:** Identify obsolescence issues before they impact operations.
- **Improve Decision-Making:** Visual and structured insights into at-risk systems.
- **Custom reports delivered on a user-defined schedule, providing actionable insights**
- **Empowers sustainment teams with enhanced decision-making capabilities through advanced analytics to ensure proactive lifecycle management and risk mitigation.**

Deliverables:

- **Automated analysis:** Leverages user-uploaded BOMs/Component lists and integrated OEM data to:
 - Automatically identify obsolete components and those nearing End-of-Life (EOL)
 - Predict potential obsolescence risks using intelligent risk modeling
- **Comprehensive System Report:** Generates a detailed report of the system's components, including:
 - Source of data and associated metadata
 - Clickable links to OEM and vendor sites for real-time part status and recommended replacements
 - Replacement options based on vendor recommendations and specification equivalency
 - Above is based on parts' data being available publicly, for non-public data sources contact MANTECH for further pricing information.

Feature	Benefit
Automated Data Extraction	Ingests PDFs, website data, cameo models, and structured data sources for obsolescence data using intelligent parsers.
Smart Web Agent	Periodically scans trusted vendor sites and public resources for obsolescence notices, datasheets, and lifecycle updates.
Intelligent Part Matcher	Automatically suggests replacement parts based on vendor recommendations, specification equivalence, or system compatibility.
Replacement Parts Recommendations	Recommended parts using a drop-in rating based on form, fit, function and system dependencies.
Scheduled Assessments	Allows users to configure regular evaluations of system components and generate obsolescence readiness reports.

OBsolescence Management Support Services Pricing

Support Package	Description	Cost
Proof of Concept	4 Month Proof of Concept, with the generation of up to 1 report a month and up to 10,000 parts processed each month. Reports generated will be using our base template and there will be no customization to the template or thorough assessment of component data for automated ingestions and report generation.	\$8,000
Year 1 Service Cost	For the initial year, the solution includes a thorough assessment of your component data and the configuration of our automated data ingestion system. It establishes a consistent delivery cadence and an automated delivery solution. This assumes the generation of up to 4 reports monthly, with a limit of 10,000 parts processed each month.	\$26,000/yr
Year 2+	Follow-on years assumes the generation of up to 4 reports monthly, with a limit of 10,000 parts processed each month.	\$16,000/year
Report Customization	For customization of reporting templates with client requirements of additional meta data or visualization.	Request Pricing

Metis Foundry Agents (Metis)

Agent Option	Description	Cost
Obsolescence Management Agent	The Obsolescence Management Agent automatically identifies risks associated with system parts. It accepts system part data, such as a Bill of Materials (BOM), engineering drawing, or system architecture model, to search for end-of-life information, availability statuses, and replacement part information for at-risk components. The agent also contextualizes the risks of obsolete parts within the larger system. Replacement part analysis considers vendor recommendations and parts with similar physical and functional characteristics. A drop-in rating is provided for replacement parts, indicating the difficulty of swapping out the at-risk part.	Request Pricing
Portfolio Optimization Agent	The Portfolio Optimization Agent conducts optimization analyses of an organization's system portfolio, with the objective of minimizing cost or risk. The agent analyzes the functionalities and capabilities of each system within a system architecture model, assesses associated costs and risks, identifies systems providing redundant capabilities, and proposes a reallocation of system resources to reduce overall cost and risk.	Request Pricing
Digital Thread Chatbot	The Digital Thread Chatbot provides an intuitive, conversational interface for your engineering ecosystem. Users can ask questions in natural language to query the underlying digital thread, which connects data from disparate tools like Cameo, Windchill, and Jira. This allows them to not only retrieve information but also compare data across the ecosystem, such as analyzing differences between two SysML models. This innovative solution makes complex, lifecycle-spanning information accessible to everyone. It significantly lowers the barrier of entry, enabling users to easily interact with and understand their interconnected engineering data.	Request Pricing

Intelligent Engineering Practice Rates

Leverage our expert-vetted talent to build, integrate, and manage your digital engineering ecosystem. Our staff spans all core disciplines—from systems and hardware to software development and DevSecOps—to accelerate your program's life cycle.

Category	Description	Rate
Digital Engineer VP	A senior executive accountable for the entire enterprise-level engineering and technology strategy. This role defines the vision for the fully integrated digital ecosystem, linking engineering from concept through manufacturing and sustainment. They make final decisions on major technology platform investments, drive the organizational structure for digital integration, and are ultimately responsible for the engineering organization's technical capability and performance.	\$575
Digital Engineer Fellow / Director	This level represents peak expertise. Manages a large, multi-disciplinary organization. Develops the long-term technology roadmaps, governs the enterprise digital architecture, and directs the implementation of new digital engineering platforms and infrastructure. Serves as the organization's highest technical authority in a specific domain. Pioneers novel digital methodologies (e.g., physics-informed AI, system-of-systems digital twin architecture) and solves the most complex, unprecedented technical challenges that span multiple domains.	\$495
Digital Engineer V / Manager	A technical lead or manager who directs a broad functional area or a complex program, focusing on digital process, tools, and resource optimization. This role is responsible for standardizing digital engineering methodologies (e.g., MBSE practices, agile frameworks, DevSecOps implementation) across multiple teams. They manage budgets, technology insertion (e.g., new toolchain acquisition), and the technical talent pipeline for their department.	\$395
Digital Engineer IV / Supervisor	A technical lead or first-line supervisor who provides technical oversight and direction for a specific project team (e.g., agile squad, hardware design team). This role is accountable for the team's technical execution, including managing model-based configuration management, ensuring adherence to the system architecture, leading technical reviews (e.g., code reviews, design reviews), and managing the team's integration with the broader digital ecosystem (e.g., CI/CD pipeline, PLM workflow).	\$295
Digital Engineer III	A senior engineer who leads the design, development, and analysis of complex, high-impact systems or subsystems. This engineer integrates multi-disciplinary models (e.g., connecting functional architecture in MBSE to physical CAD and performance simulations) and executes complex trade studies. Responsibilities include leading major design activities, architecting software components, implementing automated analysis workflows, and mentoring junior engineers in advanced digital methodologies.	\$250

Intelligent Engineering Practice Rates *Continued*

Category	Description	Rate
Digital Engineer II	A journey-level engineer who functions as an independent contributor on moderately complex tasks. This engineer develops, models, and analyzes discrete system components or software features. Responsibilities include creating and validating physics-based simulation models (FEA, CFD), developing and testing software modules (unit/integration testing), and authoring/maintaining subsystem-level SysML models. They are expected to connect their work products within the digital thread and resolve technical issues in their domain.	\$200
Digital Engineer I	An entry-level engineer who executes predefined technical tasks under close supervision. This role supports the digital thread by populating and modifying models (e.g., updating CAD components, editing SysML diagrams), writing or debugging small code modules, executing unit tests, and documenting results. They operate within established digital infrastructure (e.g., version control, PLM systems) and are focused on learning and applying foundational digital tools.	\$175

ADVANCED CYBER TRAINING PROGRAM (ACTP)

MANTECH's ADVANCED CYBER TRAINING PROGRAM (ACTP) provides tailored, industry-leading training on Computer Network Operations Programming. ACTP began in 2009 as a MANTECH Independent Research and Development project for internal training and is now a world-class cyber training program.

ACTP exclusively trains MANTECH employees and US Government personnel within our military and intelligence community. ACTP's course portfolio provides mission-essential training in Windows, Linux, and Android environments to industry customers. Course delivery is a combination of group lecture, one-on-one instruction, and experiential learning lab exercises. The Linux CNO and Windows CNO Programmer Courses are intensive, hands-on courses focused on developing experienced systems programmers into CNO professionals on the Linux and Windows platforms. These classes are formatted to combine lectures and demonstrations with practical assignments.

An ACTP student in the CNO Programmer Course develops technologies to defend, attack and exploit computer networks. This requires a deep understanding of operating systems and software internals, combined with advanced skills in C, assembly, networking, and reverse engineering. It also requires specialized knowledge and experience that cannot be gained through conventional education or programming work.

Students who complete either CNO Programmer course will return to their team or report for duty on-contract ready to participate in and support the full CNO tool development process.

ACTP instructors perform work on MANTECH contract assignments and instruct solely in their areas of subject matter expertise. Instructors are selected and screened based on their technical knowledge, industry experience, and ability to provide instruction in both group and one-on-one training environments. MANTECH's instructors perform this work professionally, continuing to support our customer's most critical missions as they bring those experiences to the classroom.

For additional information on ACTP or to connect with a member of the team, please email ACTP@MANTECH.com.

CNO LINUX PROGRAMMING

COURSE DESCRIPTION

The Linux Computer Network Operations (CNO) Programming course is an intensive, hands-on course focused on providing students with the skills and knowledge needed to become an advanced CNO programmer, with emphasis in the Linux environment. Students embark on a 10-week journey, beginning at using user space POSIX APIs, continuing to advanced topics such as manipulating ELF files and exploiting vulnerable services, and ending with the design and deployment of CNO tools within the Linux kernel itself. The class format combines lectures and demonstrations with practical lab assignments, including two “crucible labs” that function as culminating exercises. This course has been updated to Ubuntu 24.04.

LEARNING OUTCOMES

After the completion of the three modules, the student will be capable of assisting in the CNO tool development lifecycle. The student will understand the tool objectives, environments, obstacles and pitfalls associated with development, as well as strategies to meet objectives effectively and efficiently.

COURSE OUTLINE

The course contains the following modules:

Core Module (17 days)

- Python (3 days)
- Networks (5 days)
- Assembly (3 days)
- Software Reverse Engineering (5 days)
- Core Crucible (1 day)

User Mode Development Module (20 days)

- Linux System Programming (4 days)
- Linux Internals (4 days)
- Linux CNO User Mode Development (5 days)
- Linux Vulnerability Research and Exploitation (5 days)
- Linux User Mode Crucible (2 days)

Kernel Mode Development Module (8 days)

- Linux Kernel Internals
- Linux CNO Kernel Mode Development

PREREQUISITE(S)

Students should have a Bachelor’s degree in Computer Science or Computer Engineering, or equivalent experience. Students should also possess high academic achievement or operational/technical experience and an intense desire to learn. This course requires previous programming experience in C. Students should possess experience in Linux Programming and IA-32 assembly.

ENROLLMENT

Submit student enrollment requests to ACTP@MANTECH.com. The training administrator will expedite your request and payment requirements. Please contact ACTP@MANTECH.com with any questions.

COURSE LENGTH

The entire course is approximately 45 days in length.

INSTRUCTORS

Our instructors are members of an elite group of cyber professionals and have been chosen for their technical knowledge, industry experience, and facilitation skills. Instructors are rotated between the classroom and contract positions to ensure their skills are current and operationally relevant.

TRAINING FACILITIES

We have training facilities in Hanover, Maryland and Jessup, Maryland, and can set up training sites at CONUS locations per customer request. Our VTC and Virtual Instructor Led Training are available as well as on-site training.

CLASS SIZE

Minimum class size is eight (8). Two instructors will be provided for class sizes exceeding eight (8) students. Note: ACTP routinely meets minimum requirements by combining multiple customers within a course run.

GRADING

Each class features one or more quizzes and a final exam. An average exam score of 80% is a passing grade. Students who complete all 10 graded classes, with an 80% average or better, are recognized as MANTECH Certified Advanced Cyber Programmers (CACPs), and receive certification. Students who achieve a 95% or higher receive honors. Students that do not receive a certifying grade will receive certificates of attendance, or graduation

TUITION

Full course enrollment is \$36,000. Modular and weekly enrollments are offered based on seat availability. Online and remote enrollments are also available upon request. Please see pricing below.

CNO CORE (17 DAYS)		
Python	3 Days	The Python class is an introduction to the Python programming language with an emphasis on tools and techniques that are useful for CNO tasks such as test development and vulnerability research.
Networks	5 Days	The Networks class is a practical exploration of IPv4 and IPv6 networks and sockets programming.
Assembly	3 Days	The Assembly class covers the x86 (IA-32) and x86-64 (AMD64) assembly languages.
Software Reverse Engineering	5 Days	The Software Reverse Engineering class introduces tools and techniques for analyzing x86 and x86-64 executable files.
Core Crucible	1 Day	In the Core Crucible, students work in teams to analyze and exploit a botnet.
CNO Core Modular Enrollment		\$17,000

CNO LINUX PROGRAMMING *CONTINUED*

LINUX USER MODE DEVELOPMENT (20 DAYS)		
Linux Systems Programming	4 Days	The Linux Systems Programming class introduces Linux development tools and the POSIX and Linux APIs.
Linux Internal	4 Days	Linux Internals delves further into Linux with advanced uses of the POSIX API, C library internals, parsing and manipulation of ELF files, and Linux-specific system calls.
Linux CNO User Mode Development	5 Days	Building on the material from the preceding classes, the CNO User Mode Development class provides instruction on fundamental techniques and best practices for CNO tool development.
Linux Vulnerability Research and Exploitation	5 Days	Students in the Vulnerability Research and Exploitation class learn how to analyze and exploit vulnerabilities in software.
Linux User Mode Crucible	2 Days	In the User Mode Crucible, students work in teams to analyze and exploit a vulnerable network service.
User Mode Development Modular Enrollment		\$20,000

LINUX KERNEL MODE DEVELOPMENT (8 DAYS)		
Linux Kernel Mode Development	8 Days	The Kernel Internals class introduces students to the major subsystems, configuration and compilation, and module/driver development for the Linux kernel. The CNO Kernel Mode Development class builds on the previous class to introduce techniques useful for Linux Kernel CNO.
Kernel Mode Development Enrollment		\$8,000

CNO WINDOWS PROGRAMMING

COURSE DESCRIPTION

The Windows Computer Network Operations Programming course is an intensive, hands-on course focused on providing a programmer with the skills and knowledge needed to become an advanced CNO programmer, with emphasis in the Windows environment. The class format combines both lecture and labs for practical application of knowledge, including two labs that function as culminating exercises. This course has been updated to Windows 11.

LEARNING OUTCOMES

After the completion of the three modules, the student will be capable of assisting in the CNO tool development lifecycle. The student will understand the tool objectives, environments, obstacles and pitfalls associated with development, as well as strategies to meet objectives effectively and efficiently.

COURSE OUTLINE

The course contains the following modules:

Core Module (17 days)

- Python (3 days)
- Networks (5 days)
- Assembly (3 days)
- Software Reverse Engineering (5 days)
- Core Crucible (1 day)

User Mode Development Module (20 days)

- Windows System Programming (4 days)
- Windows Internals (4 days)
- Windows CNO User Mode Development (5 days)
- Windows Vulnerability Research and Exploitation (5 days)
- Windows User Mode Crucible (2 days)

Kernel Mode Development Module (8 days)

- Windows Kernel Internals
- Windows CNO Kernel Mode Development

PREREQUISITE(S)

Students should have a Bachelor's degree in Computer Science or Computer Engineering, or equivalent experience. Students should also possess high academic achievement or operational/technical experience and an intense desire to learn. This course requires previous programming experience in C. Students should possess experience in Windows Programming and IA-32/64 assembly.

ENROLLMENT

Submit student enrollment requests to ACTP@MANTECH.com. The training administrator will expedite your request and payment requirements. Please contact ACTP@MANTECH.com with any questions.

COURSE LENGTH

The entire course is approximately 45 days in length.

CNO WINDOWS PROGRAMMING *CONTINUED*

INSTRUCTORS

Our instructors are members of an elite group of cyber professionals and have been chosen for their technical knowledge, industry experience, and facilitation skills. Instructors are rotated between the classroom and contract positions to ensure their skills are current and operationally relevant.

TRAINING FACILITIES

We have training facilities in Hanover, Maryland and Jessup, Maryland, and can set up training sites at CONUS locations per customer request. Our VTC and Virtual Instructor Led Training are available as well as on-site training.

CLASS SIZE

Minimum class size is eight (8). Two instructors will be provided for class sizes exceeding eight (8) students. Note: ACTP routinely meets minimum requirements by combining multiple customers within a course run.

GRADING

Each class features one or more quizzes and a final exam. An average exam score of 80% is a passing grade. Students who complete all 10 graded classes, with an 80% average or better, are recognized as MANTECH Certified Advanced Cyber Programmers (CACPs), and receive certification. Students who achieve a 95% or higher receive honors. Students that do not receive a certifying grade will receive certificates of attendance, or graduation

TUITION

Full course enrollment is \$36,000. Modular and weekly enrollments are offered based on seat availability. Online and remote enrollments are also available upon request.

We also offer modular enrollment, based on seat availability (please see pricing below).

WINDOWS CNO CORE (17 DAYS)		
Python	3 Days	The Python class is an introduction to the Python programming language with an emphasis on tools and techniques that are useful for CNO tasks such as test development and vulnerability research.
Networks	5 Days	The Networks class is a practical exploration of IPv4 and IPv6 networks and sockets programming.
Assembly	3 Days	The Assembly class covers the x86 (IA-32) and x86-64 (AMD64) assembly languages.

CNO Core Modular Enrollment		\$17,000

WINDOWS CNO PROGRAMMING *CONTINUED*

WINDOWS USER MODE DEVELOPMENT (20 DAYS)		
Windows Systems Programming	4 Days	The Windows Systems Programming class introduces Windows development tools and the Win32 API.
Windows Internals	4 Days	Windows Internals moves beyond the Win32 API introduced in the previous class to describe the advanced Windows operating system concepts used to implement it.
Windows CNO User Mode Development	5 Days	Building on the material from the preceding classes, the CNO User Mode Development class provides instruction on fundamental techniques and best practices for CNO tool development.
Windows Vulnerability Research and Exploitation	5 Days	Students in the Vulnerability Research and Exploitation class learn how to analyze and exploit vulnerabilities in software.
Windows User Mode Crucible	2 Days	In the User Mode Crucible, students work in teams to analyze and exploit a vulnerable network service.
User Mode Development Modular Enrollment		\$20,000

WINDOWS KERNEL MODE DEVELOPMENT (8 DAYS)		
Windows Kernel Mode Development	8 Days	The Kernel Internals class expands on the user mode content to introduce students to the Windows Kernel architecture and fundamentals of driver development. The CNO Kernel Mode Development class builds on the previous class to introduce techniques useful for Windows Kernel CNO.
Kernel Mode Development Enrollment		\$8,000

ADVANCED VULNERABILITY RESEARCH

COURSE DESCRIPTION

The Advanced Vulnerability Research course is ACTP's most technical and challenging offering. Designed for those who are looking to take their VR skills to the next level, this five-day course will teach students how to find vulnerabilities using techniques such as fuzzing, symbolic execution, and code property graphs. Written by a team of vulnerability research experts, this course will teach students how to find bugs such as use-after-free, type confusion, memory corruption, and logic bugs in software applications like web browsers and operating system kernels.

PREREQUISITE(S)

Students should have a Bachelor's degree in Computer Science or Computer Engineering, or equivalent experience. Students should also possess high academic achievement or operational/technical experience and an intense desire to learn. Students are expected to have a firm grasp of x86-64 assembly, strong programming skills in C and C ++, and be comfortable with reverse engineering software using IDA and Ghidra.

COURSE DETAILS

- 5 days
- 12 labs
- 1 practical exam

UPCOMING

ADVANCED VR-Level II is expected to be released Q3 2027

ENROLLMENT

Submit student enrollment requests to ACTP@MANTECH.com. The training administrator will expedite your request and payment requirements. At this time, enrollment is limited to MANTECH employees and government employees. Please contact ACTP@MANTECH.com with any questions.

TUITION

Tuition Price for the course which includes all material is \$5,000 per seat.

INSTRUCTORS

Our instructors are members of an elite group of cyber professionals and have been chosen for their technical knowledge, industry experience, and facilitation skills. Instructors who understand the real challenges facing programmers because they perform the work professionally every day.

TRAINING FACILITIES

We have training facilities in Hanover, Maryland and Jessup, Maryland, and can set up training sites at CONUS locations per customer request. Our VTC and Virtual Instructor Led Training are available as well as on-site training.

CLASS SIZE

Minimum class size is eight (8). Two instructors will be provided for class sizes exceeding eight (8) students. Note: ACTP routinely meets minimum requirements by combining multiple customers within a course run.

GRADING

Class culminates in a final exam. Students who complete the course with an 80% or better are awarded a certificate acknowledging successful completion. Students that do not receive a certifying grade will receive certificates of attendance.

COURSE CONTENT - *ADVANCED VULNERABILITY RESEARCH*

Day 1:

- Code Auditing: A thorough review of auditing techniques across source code and binaries. This section gives students the deep technical insights to approach looking for vulnerabilities in open source and closed source applications using advanced code auditing techniques and writing custom analysis scripts for Ghidra.
- Integer Errors and Race Conditions: Students will become familiar with identifying undefined integer operations and dangerous synchronization patterns that lead to exploitable bugs

Day 2:

- Fuzzing: Students will learn how to use modern fuzzing tools such as AFL++ to find vulnerabilities in target programs. This includes hands-on labs to attack network-based applications.
- Type Confusion: A deep dive into understanding and finding type confusion bugs.

Day 3:

- Advanced Fuzzing: Building on the previous fuzzing section, students will write custom fuzzing harnesses for hard targets and learn about fuzzing exotic interfaces such as RPC and operating system calls. This section also covers emulation and instrumentation engines such as Unicorn Engine and Frida.
- Memory Corruption: This section gives students a deep understanding of the memory corruption bug class and how to detect these flaws during fuzzing.

Day 4:

- Symbolic Execution: A deep dive into the cutting-edge VR concepts of symbolic execution from SAT and SMT solvers, intermediate representations and languages, and execution engines. Students will write their own x86-64 symbolic execution engine and learn how to use angr

Day 5:

- Code Property Graphs: An introduction to graph theory will lead students into understanding how to combine abstract syntax trees, control flow graphs, and data flow graphs into code property graphs. From there, modern tools such as Joern will show how these techniques can find subtle vulnerabilities.
- Use-After-Free and Information Disclosures: This section details the intricate ways that information disclosures and use-after-free vulnerabilities manifest.
- Final Exam

ANDROID PROGRAMMING

COURSE DESCRIPTION

The Android Programming course is a unique course offering students the ability to explore the Android operating system. This lab-driven class exposes students to the entire OS API, covering everything from development of Android applications using the SDK and Android Studio to how these APIs map to native libraries, the Linux kernel, and Android specific kernel components. There is also a heavy emphasis on security at each level covered, including features and developments from the latest releases of Android.

PREREQUISITE(S)

This course is a pre-requisite for the Android Internals course.

Students should have a Bachelor's degree in Computer Science or Computer Engineering, or equivalent experience.

Students should also possess high academic achievement or operational/technical experience and an intense desire to learn. This course assumes basic knowledge of Java and C programming.

COURSE DETAILS

- 5 days
- 19 labs
- 3 quizzes, 1 practical exam
- Android device (Google Pixel 12) and development environment is provided

UPCOMING

Upgrading to Google Pixel 15 Q4 2026

ENROLLMENT

Submit student enrollment requests to ACTP@MANTECH.com. The training administrator will expedite your request and payment requirements. At this time, enrollment is limited to MANTECH employees and government employees. Please contact ACTP@MANTECH.com with any questions.

TUITION

Tuition Price for the course which includes all material is \$4,000 per seat.

INSTRUCTORS

Our instructors are members of an elite group of cyber professionals and have been chosen for their technical knowledge, industry experience, and facilitation skills. Instructors who understand the real challenges facing programmers because they perform the work professionally every day.

TRAINING FACILITIES

We have training facilities in Hanover, Maryland and Jessup, Maryland, and can set up training sites at CONUS locations per customer request. Our VTC and Virtual Instructor Led Training are available as well as on-site training.

CLASS SIZE

Minimum class size is eight (8). Two instructors will be provided for class sizes exceeding eight (8) students. Note: ACTP routinely meets minimum requirements by combining multiple customers within a course run.

GRADING

This course features one or more quizzes and a final exam. An exam score of 80% is a passing grade and allows acceptance into the Android Internals course. Students who complete the course with an 80% or better are awarded a certificate acknowledging successful completion of the course. Students that do not receive a certifying grade will receive certificates of attendance.

COURSE CONTENT - ANDROID PROGRAMMING

Day 1:

- Understand the overall Android architecture
- Explore the Android Open Source Project (AOSP) and learn about its structure
- Learn to use the Android Debugging Bridge (ADB) to install APKs, push and pull files from a device, view logs, and gain shell access
- Learn about the various Android device modes and what they are used for
- Use Android Studio to build applications
- Understand the structure and lifecycle Android applications
- Explore the use of Application Manifests and how they relate to intents and permissions Understand the various states of a process (foreground, visible, cached, etc.)
- Understand what rooting is and why you might want to root a device
- Discuss bootloaders (locked and unlocked) and how they relate to the security of a device
- Understand the Android file system by finding where applications, shared libraries, media content and other core files are stored on the device
- Learn about the steps an Android device takes to boot
- Root and flash your phone

Day 2:

- Learn about the activity lifecycle
- Gain hands on experience using explicit and implicit intents as well as intent filters
- Use the application manager utility to send various kinds of intents
- Implement Foreground and Background services
- Explore the service lifecycle
- Send and receive broadcast intents
- Learn about the various Android permissions and how they are granted
- Android Services: development, types, AIDL interface language
- Implement applications that use explicit and implicit intents

Day 3:

- Understand the nature of Android Content Providers and their role in application development
- Understand what Framework Services are and their role
- Learn about the Binder driver – functionality, implementation
- Interact with various sensors on the device
- Understand how to access sensor services on the device
- Write an application using Android JNI
- Native Code and Native Development Kit (NDK) introduction

Day 4:

- Android Native Sensors
- Android Native Service development
- Cross-compilation process
- Android Native to Java Communication Models
- Understand how a call from an application flows down to the hardware
- Learn about the various types of hardware abstraction layers (HAL) throughout the versions
- Understand how the init initializes the Android operating system

Day 5:

- In-depth Practical. This includes completing various tasks that cover concepts taught throughout the course. Some tasks are standalone, and others require you to complete a previous task before being able to complete the next one.

ANDROID INTERNALS

COURSE DESCRIPTION

The Android Internals course builds on the foundation established in the Android Programming course. This course dives deeper into the Android operating system to explore concepts such as the internals of APKs, Package Manager, Activity Manager, Zygote, Android Services and other core components of Android. Students will have a strong understanding of the Android Radio Interface layer. They will know how to hide phone calls, send hidden text messages, alter text messages, etc. Students will be able to describe how Wi-Fi works on Android, and how network technology preference works (Wi-Fi over Cellular). Students will also learn about security on Android and be able to determine which security mechanism is stopping a particular action from occurring.

PREREQUISITE(S)

Students must earn a minimum score of 80% in the Android Programming course to be accepted into Android Internals. Students should have a Bachelor's degree in Computer Science or Computer Engineering, or equivalent experience. Students should also possess high academic achievement or operational/technical experience and an intense desire to learn. This course assumes basic knowledge of Java and C programming.

WHO SHOULD ATTEND

- Developers and researchers looking to learn how to write code for mobile platforms.
- Android developers looking to write more secure code
- Security researchers looking to gain insight into the Android OS architecture.

COURSE DETAILS

- 5 days
- 19 labs
- 3 quizzes, 1 practical exam
- Android device (Google Pixel 12) and development environment is provided - upgrading to Google Pixel 15 Q4 2026

ENROLLMENT

Submit student enrollment requests to ACTP@MANTECH.com. The training administrator will expedite your request and payment requirements. At this time, enrollment is limited to MANTECH employees and government employees. Please contact ACTP@MANTECH.com with any questions.

TUITION

Tuition Price for the course which includes all material is \$4,000 per seat.

INSTRUCTORS

Our instructors are members of an elite group of cyber professionals and have been chosen for their technical knowledge, industry experience, and facilitation skills. Instructors who understand the real challenges facing programmers because they perform the work professionally every day.

TRAINING FACILITIES

We have training facilities in Hanover, Maryland and Jessup, Maryland, and can set up training sites at CONUS locations per customer request. Our VTC and Virtual Instructor Led Training are available as well as on-site training.

CLASS SIZE

Minimum class size is eight (8). Two instructors will be provided for class sizes exceeding eight (8) students. Note: ACTP routinely meets minimum requirements by combining multiple customers within a course run.

GRADING

Quizzes and Labs are administered as knowledge checks during the course regularly. Class culminates in a final exam. Students who complete the course with an 80% or better are awarded a certificate acknowledging successful completion.

COURSE CONTENT - ANDROID INTERNALS

Day 1:

- Explore the various partitions of an Android device
- Understand each phase of the boot process for Android
- Learn about the role that Verified boot plays in protecting Android devices
- Learn about A/B slots
- Understand the changes that came from project Treble in Android 8.0
- Analyze the init script in Android to understand how it initializes the OS
- Learn about the various daemons that init starts and what their roles are
- Learn about the various stages of init (i.e. first, second, early-init, init, late-init etc)
- Understand the role that Properties plays in configuring and initializing Android
- Students will be able to freely navigate, build, and deploy Android builds from source
- Students will be able to dump the device's bootloaders and understand the different stages of verified boot in Android
- Students will learn how to redirect files that are mounted on a read only filesystem

Day 2:

- Understand the crucial role Zygote plays in initializing apps
- Explore the differences between the Dalvik VM and ART
- Write a program to communicate directly with Zygote to spawn a new process
- Understand the relationship between System Server and Service Manager
- Understand and describe how the core services are laid out, and what functionality is provided by which service
- Understand how services are managed and located
- Learn about the internals of the APK structure
- Learn about .dex, .odex, .art files
- Understand the various ways to sign an APK and the security implications of each one

Day 3:

- Decompile APKs
- Reverse engineering APKs
- Learn about smali and baksmali
- Understand each step of installing an APK to an Android device
- Be able to manually create Java applications outside of the Android Framework
- Understand the Package Manager and its role
- Know how to interact with the Activity Manager via native code
- Understand the internals of Binder
- Use Binder using native code
- Understand exploit vulnerabilities from cross-app permission use

Day 4:

- Learn the Android Bluetooth Stack
- Covertly communicate over Bluetooth with other devices
- Learn how Android communicates with the baseband on the device
- Understand how vendors provide proprietary libraries to implement the radio interface layer
- Students will have a strong understanding of the Android Radio Interface layer. They will know how to hide phone calls, send hidden text messages, fake text messages, alter text messages etc
- Learn about the various Wi-Fi protocols and what a Wi-Fi looks like
- Learn about the various Wi-Fi technologies supported by Android (Wi-Fi direct, Wi-Fi aware etc)

Day 5:

- Learn about the many security mechanisms added to Android from 1.5 up to current
- Learn about DAC vs MAC
- Understand how Android leverages users and groups in Linux to enforce access control and sandboxing
- Understand the role SELinux plays in securing Android devices
- Understand the role capabilities plays in securing Android devices, and explore the role of seccomp
- Understand how permissions at the application manifest level are enforced in the kernel

EMBEDDED CNO & HARDWARE HACKING

COURSE DESCRIPTION

The Embedded CNO course introduces hardware hacking to students with prior software CNO knowledge. Learn to exploit both physical and emulated embedded systems. Using hands-on tools and techniques, students will work through each step of the hardware hacking process on four different platforms. This course explores how to communicate with devices using industry-standard serial and testing protocols, and teaches how to extract, reverse engineer, and modify firmware from several common platforms. Developed by a team of computer engineers and embedded developers, the course uses QEMU to emulate devices for safe practice. Students will also gain a high-level understanding of physical exploitation techniques like fault injection and side channel attacks.

PREREQUISITE(S)

Students should have a Bachelor's degree in Computer Science or Computer Engineering, or equivalent experience. Students should also possess high academic achievement or operational/technical experience and an intense desire to learn. This course assumes basic knowledge of Java and C programming, and general experience with software reverse engineering using Ghidra.

COURSE DETAILS

- 5 days with hands-on-lecture, labs, and final exam.
- All materials needed for the development environment are provided

ENROLLMENT

Submit student enrollment requests and questions to ACTP@MANTECH.com. The training administrator will expedite your request and payment requirements. At this time, enrollment is limited to MANTECH employees and government employees.

TUITION

Tuition Price for the course which includes all material and a ~\$500 take-home hardware kit is \$6,000 per seat.

HARDWARE EQUIPMENT LIST

Raspberry Pi 5 8GB RAM, with 128GB SD card and chassis	FTDI serial adapter
Raspberry Pi Pico2	Multimeter, breadboard, resistors, wires, etc.
iCESugar-nano (Mini FPGA)	Flash breakout boards
Logic analyzer (Sigrok, USB)	Mini soldering project
Pomona SOIC clip	Peripherals (7 segment display, OLED screen)

INSTRUCTORS

Our instructors are members of an elite group of cyber professionals and have been chosen for their technical knowledge, industry experience, and facilitation skills. Instructors who understand the real challenges facing programmers because they perform the work professionally every day.

TRAINING FACILITIES

We have training facilities in Hanover, Maryland and Jessup, Maryland, and can set up training sites at CONUS locations per customer request. **This class does not support virtual training at this time.**

CLASS SIZE

Minimum class size is eight (8). Two instructors will be provided for class sizes exceeding eight (8) students. Note: ACTP routinely meets minimum requirements by combining multiple customers within a course run.

GRADING

Students who complete the final exam with an 80% or better are awarded a certificate acknowledging successful completion of the course. Students that do not receive a certifying grade will receive certificates of attendance.

COURSE CONTENT - EMBEDDED CNO & HARDWARE HACKING

Day 1:

- Definition of an embedded systems
- Overview of course tools
- PCB analysis and target enumeration concepts
- Raspberry Pi Pico deep dive and labs
- SPI and I2C flash memory labs
- Bootloader overview

Day 2:

- File systems and flash memory dumps lecture and lab
- Travel router firmware VR/E (6-part lab)
- QEMU introduction and labs

Day 3:

- Dancing Cactus enumeration and PCB analysis
- Introduction to verilog and digital logic
- Introduction to FPGA

Day 4:

- Designing embedded systems with peripherals
- Designing a customer co-processor

Day 5:

- JTAG and RTOS
- Advanced topics in hardware hacking attack techniques
- Wifi Camera target lab (Ghidra MCP)
- Final Exam

GOOGLE WORKSPACE SERVICES

Google Workspace	Description	Price Per Year, Per User	Price Per Month, Per User
Google Workspace Enterprise Plus	<ul style="list-style-type: none"> AI assistants including Gemini in Workspace, Gemini App, and NotebookLM Plus Custom and secure business email + eDiscovery, retention, S/MIME encryption 1000 Participant video meetings + recording, attendance tracking, noise cancellation, in domain live streaming Advanced security management, compliance control standards, vault, DLP, data regions Unlimited Storage 	\$420	\$35
Assured Controls Plus	Assured Controls Plus for Google Workspace are specialized feature sets that provide organizations with advanced tools and support for managing compliance and security requirements.	\$360	\$30

Summary for Below is optional additional services. Note all services below are based on a 250/user minimum.

Change Management Consulting, Google Workspace	Process improvement workflows with Google Workspace tools	\$500 / Hour
CMMC Consulting	CMMC Level 1.0, 2.0	\$600 / Hour
Google Workspace CMMC Configuration	Google Workspace Configuration at CMMC level 2.0 Environment Configuration to Google's CMMC standards based on their configuration guidelines	\$10,000

GOOGLE WORKSPACE TRAINING

Course Title	Description	Duration	Basis	Price
<p>Google Workspace Fundamentals</p>	<p>Course Description:</p> <p>Developed by MANTECH's team of certified experts, this course provides a comprehensive introduction to the core applications within Google Workspace. It is designed for new users or those seeking to build a strong foundation in cloud-based collaboration. Participants will learn how to effectively use Gmail, Google Calendar, and Google Drive, and gain hands-on experience with the core productivity apps: Docs, Sheets, and Slides. The training focuses on practical skills for enhancing personal productivity and improving team collaboration.</p> <p>Prerequisites: Basic computer literacy and experience using a web browser. No prior Google Workspace experience is required.</p> <p>Learning Objectives: Navigate the Google Workspace interface and manage application settings. Efficiently manage email and communications using Gmail's advanced features. Organize schedules, create events, and manage shared calendars in Google Calendar. Store, organize, and share files securely using Google Drive. Collaborate in real-time to create and edit documents, spreadsheets, and presentations. Effectively participate in virtual meetings using Google Meet.</p> <p>Course Outline: Module 1: Mastering Communication with Gmail and Google Calendar Module 2: Cloud Storage and File Management with Google Drive Module 3: Real-Time Collaboration with Google Docs and Sheets Module 4: Creating Impactful Presentations with Google Slides and Hosting Virtual Meetings with Google Meet</p>	<p>4 Hours (Half Day)</p>	<p>Per Student (minimum of 4 students per webinar)</p>	<p>\$195.00</p>
<p>Google Workspace Advanced Fundamentals</p>	<p>Course Description:</p> <p>This MANTECH course is designed for users already familiar with the basics of Google Workspace who want to unlock the full potential of the platform. The curriculum moves beyond fundamental features to explore advanced capabilities that drive efficiency and innovation. Participants will learn powerful techniques in Gmail, advanced data handling in Sheets, sophisticated presentation design in Slides, and best practices for file and permission management in Drive.</p> <p>Prerequisites: Completion of "Google Workspace Fundamentals" or equivalent hands-on experience with the core Google Workspace applications.</p> <p>Learning Objectives: Implement advanced search operators, filters, and templates in Gmail to streamline inbox management. Utilize advanced features in Google Calendar, such as appointment slots and finding optimal meeting times. Employ advanced sharing and permission settings in Google Drive to ensure data security. Use advanced functions, pivot tables, and charting tools in Google Sheets for data analysis. Create professional, engaging presentations in Google Slides using master slides, transitions, and embedded</p>	<p>4 Hours (Half Day)</p>	<p>Per Student (minimum of 4 students per webinar)</p>	<p>\$225.00</p>

	<p>media.</p> <p>Course Outline:</p> <p>Module 1: Advanced Productivity in Gmail and Calendar</p> <p>Module 2: Advanced Data Security and Management in Google Drive</p> <p>Module 3: In-Depth Data Analysis with Google Sheets</p> <p>Module 4: Advanced Design and Delivery with Google Slides</p>			
Google Admin Console Management	<p>Course Description:</p> <p>This full-day MANTECH course is specifically designed for IT professionals and system administrators responsible for managing a Google Workspace environment. The training provides a deep dive into the Google Admin Console, covering essential administrative tasks from user and group management to security policy implementation. Participants will learn best practices for configuring services, monitoring the environment, and ensuring organizational compliance and security.</p> <p>Prerequisites:</p> <p>A strong understanding of IT administration concepts is required. Prior experience managing enterprise IT systems is highly recommended.</p> <p>Learning Objectives:</p> <ul style="list-style-type: none"> • Navigate the Google Admin Console and understand its core sections. • Manage the user lifecycle, including creating, suspending, and deleting user accounts. • Structure the organization using Organizational Units (OUs) and configure service settings. • Implement and enforce security policies, including 2-Step Verification and password policies. • Manage groups, shared drives, and other collaborative resources. • Utilize reporting tools to audit activity and monitor the health of the Workspace environment. <p>Course Outline:</p> <ul style="list-style-type: none"> • Module 1: Introduction to the Admin Console & User Management • Module 2: Service Configuration and Organizational Unit (OU) Structure • Module 3: Implementing Core Security Policies and Controls • Module 4: Managing Groups, Calendars, and Drive Resources • Module 5: Reporting, Auditing, and Troubleshooting 	1 Day (8 Hours)	Per Student (minimum of 4 students per webinar)	\$395.00
Google Workspace for Teams	<p>Course Description:</p> <p>This is an immersive, on-site workshop designed to transform how teams collaborate. The training moves beyond individual application skills to focus on integrated workflows and best practices for project-based work. The session is highly interactive, using real-world scenarios to help teams streamline communication, centralize project assets, and co-author deliverables more effectively. This private, flat-rate course is ideal for an agency, department,</p>	1 Day (8 Hours)	Per Clas (15 Max Participants)	\$3,500.00 (Flat Rate)

Course Title	Description	Duration	Basis	Price
	<p>or project team looking to optimize their use of Google Workspace as a cohesive unit.</p> <p>Learning Objectives:</p> <ul style="list-style-type: none"> Establish and manage a centralized project hub using Shared Drives. Streamline communication and reduce email traffic using Google Chat and Spaces. Co-author and manage feedback on documents, spreadsheets, and presentations with maximum efficiency. Plan and execute projects using integrated tools like Google Calendar, Tasks, and Keep. Conduct more productive and engaging virtual meetings with Google Meet. <p>Course Outline:</p> <ul style="list-style-type: none"> Session 1: The Modern Collaborative Environment: Shared Drives & Google Chat. Session 2: From Ideation to Execution: Collaborative Project Planning and Task Management. Session 3: Real-Time Co-Authoring: Best Practices for Docs, Sheets, and Slides. Session 4: Effective Communication: Mastering Google Meet for Team Meetings and Reviews. 			
<p>Google Workspace for Federal Government</p>	<p>Course Description: Developed by MANTECH to meet the stringent requirements of the public sector, this intensive two-day course is tailored specifically for Federal Government personnel and contractors operating within a Google Workspace for Government environment. The curriculum addresses the unique security, compliance, and operational requirements of the DoD, with a heavy emphasis on data governance and secure collaboration practices within the secure government cloud.</p> <p>Prerequisites: A general understanding of Google Workspace applications. Participants must be eligible to work within DoD environments.</p> <p>Learning Objectives:</p> <ul style="list-style-type: none"> Understand the architecture and security controls of Google Workspace for Government. Implement best practices for handling CUI (Controlled Unclassified Information) within the platform. Securely manage and share data using Shared Drives with appropriate permissions. Conduct secure and compliant virtual meetings using Google Meet and Chat. Leverage Google Vault for data retention and eDiscovery requirements. 	<p>2 Day (16 Hours)</p>	<p>Per Class (15 Max Participants)</p>	<p>\$7,500.00 (Flat Rate)</p>
<p>Custom On-Site Workshop</p>	<p>Course Description: A fully tailored training solution developed in partnership</p>	<p>1 Day (8 Hours)</p>	<p>Per Class (20 Max Participants)</p>	<p>\$4,000.00 (Flat Rate)</p>

	<p>with your agency to address specific goals, workflows, and challenges. Our engagement begins with a thorough needs analysis to understand your objectives, after which our instructional designers develop a custom curriculum with bespoke materials and exercises.</p>			
<p>Introduction to Gemini AI for Defense & Public Sector (Webinar)</p>	<p>Course Description: This course provides a foundational entry point into utilizing Google Gemini on the GenAI.mil platform, specifically engineered to support the Secretary of Defense's initiative for "mass AI adoption" across the force. Participants will explore the architectural core of Generative AI, moving beyond simple chat interfaces to understand how large language models (LLMs) can be leveraged for strategic advantage. The curriculum places a critical focus on the unique security protocols required for Impact Level 5 (IL5) environments, ensuring that personnel can handle Controlled Unclassified Information (CUI) without compromising mission security. A cornerstone of the training is the mastery of "Precision Prompting"—a methodology designed to elicit high-accuracy, context-aware outputs tailored for military intelligence, administrative drafting, and operational planning. By the end of the course, users will be equipped to integrate AI into their daily workflows as a force multiplier while maintaining the highest standards of data governance and ethical AI use.</p> <p>Learning Objectives:</p> <ul style="list-style-type: none"> • Master the S.T.A.R. Prompting Framework: Apply the Situation, Task, Action, and Result (S.T.A.R.) methodology to create high-precision prompts for tactical and administrative military scenarios. • Differentiate Search vs. Generative AI: Understand the underlying mechanics of LLMs to effectively mitigate hallucinations and ensure the factual integrity of AI-generated summaries and intelligence reports. • Execute IL5-Compliant Data Operations: Implement mandatory security guidelines for handling CUI (Controlled Unclassified Information) within the GenAI.mil environment, focusing on proper data labeling and transmission. • Synthesize Intelligence and Reports: Utilize Gemini to rapidly summarize long-form white papers, intelligence briefings, and open-source data while maintaining source attribution and context. • Draft Professional Military Communication: Use AI as an assistant to draft formal correspondence, performance evaluations (OPRs/EPRs), and operational orders that adhere to standard military writing styles and protocols. • Establish Human-in-the-Loop (HITL) Best Practices: Develop an evaluative mindset for reviewing AI outputs, ensuring that all final deliverables are verified by human experts to meet Department of Defense (DoD) accuracy and ethical 	<p>4 Hours (Half Day)</p>	<p>Per Student (minimum of 4 students per webinar)</p>	<p>\$215.00</p>

<p>Workflows (Webinar)</p>	<p>users from basic chat interactions to the architecting of complex, "AI-First" workflows. Participants will learn how to treat Gemini not just as a tool, but as a collaborative teammate capable of executing multi-step operations that require reasoning, context-retention, and integrated data processing. The curriculum focuses on "Chain-of-Thought" orchestration, where users learn to break down high-level mission objectives into sequential AI tasks that automate repetitive, data-heavy burdens. Participants will explore advanced techniques for large-scale data analysis, predictive scenario planning, and the creation of custom "Prompt Libraries" that standardize excellence across a department. A critical component of this course is achieving cross-platform interoperability; students will master the integration of Gemini outputs across the Google Workspace ecosystem while also learning best practices for exporting and formatting AI-generated content for seamless use within Microsoft 365 products, including Word, Excel, and PowerPoint. By automating the movement of data across disparate toolsets, staff officers and project leads will significantly increase organizational velocity and outpace adversarial decision cycles.</p> <p>Learning Objectives:</p> <ul style="list-style-type: none"> ● Design Multi-Stage AI Workflows: Build and orchestrate sophisticated "Chain-of-Thought" workflows that link multiple prompts to achieve complex, high-stakes military and administrative outcomes. ● Advanced Data Analysis & Scenario Planning: Leverage Gemini for deep-dive analysis of mission-critical datasets and conduct predictive scenario modeling to support strategic decision-making. ● Standardize Operations with Prompt Libraries: Develop custom, department-wide "Prompt Libraries" and Standard Operating Procedures (SOPs) to ensure consistent, high-quality AI outputs across the organization. ● Drive Ecosystem Interoperability (Google & Microsoft): Master the seamless integration of Gemini outputs into both the Google Workspace ecosystem (Docs, Sheets, Slides) and Microsoft-based products (Word, Excel, PowerPoint) to ensure seamless cross-platform collaboration and reporting. 		<p>4 students per webinar)</p>

LABOR CATEGORY RATES AND DESCRIPTIONS

Labor Category	Labor Category Description	Rate
Cyber Security Operations Specialist 1	Performs analysis of enterprise defensive technologies to include COTS and GOTS products/point solutions. Conducts analysis of security incidents and/or malware incidents/outbreaks. Performs cyber threat analysis and assesses organizations' cyber risk posture. Provides security engineering consulting services related to enterprise cyber defensive tools and technologies. Bachelor's degree preferred, but not required. Specialized training in cyber defense technologies required.	\$110.00
Cyber Security Operations Specialist 2	Performs analysis of enterprise defensive technologies to include COTS and GOTS products/point solutions. Conducts analysis of security incidents and/or malware incidents/outbreaks. Performs cyber threat analysis and assesses organizations' cyber risk posture. Provides security engineering consulting services related to enterprise cyber defensive tools and technologies. Bachelor's degree preferred plus one year relevant experience. Specialized training in cyber defense technologies required.	\$125.00
Cyber Security Operations Specialist 3	Performs analysis of enterprise defensive technologies to include COTS and GOTS products/point solutions. Conducts analysis of security incidents and/or malware incidents/outbreaks. Performs cyber threat analysis and assesses organizations' cyber risk posture. Provides security engineering consulting services related to enterprise cyber defensive tools and technologies. Bachelor's degree preferred plus two years relevant experience. Specialized training in cyber defense technologies required.	\$150.00
Cyber Security Operations Specialist 4	Performs analysis of enterprise defensive technologies to include COTS and GOTS products/point solutions. Conducts analysis of security incidents and/or malware incidents/outbreaks. Performs cyber threat analysis and assesses organizations' cyber risk posture. Provides security engineering consulting services related to enterprise cyber defensive tools and technologies. Bachelor's degree preferred plus 4 years relevant experience. Relevant product or security certification can substitute for 4 years experience. Specialized training in cyber defense technologies required.	\$175.00
Cyber Security Operations Specialist 5	Performs analysis of enterprise defensive technologies to include COTS and GOTS products/point solutions. Conducts analysis of security incidents and/or malware incidents/outbreaks. Performs cyber threat analysis and assesses organizations' cyber risk posture. Provides security engineering consulting services related to enterprise cyber defensive tools and technologies. Bachelor's degree required plus 4 years relevant experience. A master's degree may be substituted for 4 years of experience. Relevant product or security certification may be substituted for 4 years experience. An additional 6 years of relevant experience may be substituted for a Bachelor's degree. Specialized training in cyber defense technologies required.	\$200.00
Cyber Security Operations Specialist 6	Performs analysis of enterprise defensive technologies to include COTS and GOTS products/point solutions. Conducts analysis of security incidents and/or malware incidents/outbreaks. Performs cyber threat analysis and assesses organizations' cyber risk posture. Provides security engineering consulting services related to enterprise cyber defensive tools and technologies. Bachelor's degree required plus 6 years relevant experience. A master's degree may be substituted for 4 years of experience. Relevant product or security certification may be substituted for 4 years experience. An additional 6 years of relevant experience may be substituted for a Bachelor's degree. Specialized training in cyber defense technologies required.	\$225.00

Cyber Security Operations Specialist 7	Performs analysis of enterprise defensive technologies to include COTS and GOTS products/point solutions. Conducts analysis of security incidents and/or malware incidents/outbreaks. Performs cyber threat analysis and assesses organizations' cyber risk posture. Provides security engineering consulting services related to enterprise cyber defensive tools and technologies. Conducts network and memory forensics analysis and is skilled at conducting reverse engineering of malicious binaries. Bachelor's degree required plus 8 years relevant experience. A master's degree may be substituted for 4 years of experience. Relevant product or security certification may be substituted for 4 years experience. An additional 6 years of relevant experience may be substituted for a Bachelor's degree. Specialized training in cyber defense technologies required.	\$250.00
Cyber Security Operations Specialist 8	Performs analysis of enterprise defensive technologies to include COTS and GOTS products/point solutions. Conducts analysis of security incidents and/or malware incidents/outbreaks. Performs cyber threat analysis and assesses organizations' cyber risk posture. Provides security engineering consulting services related to enterprise cyber defensive tools and technologies. Conducts network and memory forensics analysis and is skilled at conducting reverse engineering of malicious binaries. Bachelor's degree required plus 10 years relevant experience. A master's degree may be substituted for 4 years of experience. Relevant product or security certification may be substituted for 4 years experience. An additional 6 years of relevant experience may be substituted for a Bachelor's degree. Specialized training in cyber defense technologies required.	\$300.00
Cyber Security Operations Specialist 9	Performs analysis of enterprise defensive technologies to include COTS and GOTS products/point solutions. Conducts analysis of security incidents and/or malware incidents/outbreaks. Performs cyber threat analysis and assesses organizations' cyber risk posture. Provides security engineering consulting services related to enterprise cyber defensive tools and technologies. Conducts network and memory forensics analysis and is skilled at conducting reverse engineering of malicious binaries. Bachelor's degree required plus 12 years relevant experience. A master's degree may be substituted for 4 years of experience. Relevant product or security certification may be substituted for 4 years experience. An additional 6 years of relevant experience may be substituted for a Bachelor's degree. Specialized training in cyber defense technologies required.	\$350.00
Cyber Security Operations Specialist 10	Performs analysis of enterprise defensive technologies to include COTS and GOTS products/point solutions. Conducts analysis of security incidents and/or malware incidents/outbreaks. Performs cyber threat analysis and assesses organizations' cyber risk posture. Provides security engineering consulting services related to enterprise cyber defensive tools and technologies. Conducts network and memory forensics analysis and is skilled at conducting reverse engineering of malicious binaries. Bachelor's degree required plus 14 years relevant experience. A master's degree may be substituted for 4 years of experience. Relevant product or security certification may be substituted for 4 years experience. An additional 6 years of relevant experience may be substituted for a Bachelor's degree. Specialized training in cyber defense technologies required.	\$400.00

IT-71	Computer Forensics and Intrusion Senior Analyst	Requires a bachelor's degree in a related field. Five (5) years experience in IA. Demonstrated ability to work independently or under only general supervision. Three (3) years in computer intrusion analysis and investigation, intrusion operations and detection; computer network surveillance/monitoring; vulnerability assessments; hacker methodologies and techniques; computer network exploitation methodology and techniques; computer attack and exploitation methodologies and techniques; firewall exploitation. Three (3) years in network protocols; network devices; computer security devices; multiple operating systems; secure architecture, methodologies, and tools; hardware and software configurations; and network LAN/WAN system administration in support of computer intrusion operations.	\$432.00
IT-72	Computer Forensics and Intrusion Staff Analyst	Requires a bachelor's degree in a related field. Two (2) years experience in IA to include computer network surveillance/monitoring; vulnerability assessments; network protocols; network devices; computer security devices; hardware and software configurations; and network LAN/WAN system administration in support of information assurance.	\$322.00
IT-73	Computer Forensics and Intrusion Junior Analyst	One (1) year of experience in IA to include computer network surveillance/monitoring; vulnerability assessments; network protocols; network devices; computer security devices; hardware and software configurations; and network LAN/WAN system administration in support of information assurance.	\$213.00
IT-74	IT Information Assurance Specialist	Bachelor's degree preferred. Ten years of information security experience	\$182.00
IT-75	IT Acquisition Specialist	Bachelor's degree and 10 years of experience providing technology solutions for acquisition management.	\$232.00
IT-76	Database Administrator	Bachelor's degree preferred. Two or more years of experience administering databases to include testing backups, data integrity, and ensuring maximum uptime.	\$171.00
IT-77	IT Analyst 6	Bachelor's degree preferred. Seven years of experience providing the highest authoritative analytic leadership and consultation.	\$292.00
IT-78	IT Analyst 5	Bachelor's degree preferred. Six years of experience providing the highest authoritative analytic leadership and consultation.	\$263.00
IT-79	IT Analyst 4	Bachelor's degree preferred. Five years of experience providing the highest authoritative analytic leadership and consultation.	\$234.00
IT-80	IT Analyst 3	Bachelor's degree preferred. Four years of experience providing the highest authoritative analytic leadership and consultation.	\$205.00
IT-81	IT Analyst 2	Bachelor's degree preferred. Two years of experience providing skilled analytic leadership and consultation.	\$182.00
IT-82	IT Analyst 1	High School and three years of relevant experience. Assists senior analysts in providing analysis and consultation.	\$152.00
IT-83	Documentation Specialist 2	Bachelor's degree preferred. One year experience developing drafts and finalizing information technology documentation.	\$129.00

LABOR CATEGORY RATES AND DESCRIPTIONS CONTINUED

Code	Labor Category	Labor Category Description	Rate
IT-84	Documentation Specialist 1	High School and three years of relevant experience. Develops drafts and finalizes information technology documentation.	\$90.00
IT-85	Project Administration 5	Bachelor's degree preferred. Four years experience preparing project management administrative plans and reports.	\$158.00
IT-86	Project Administration 4	Bachelor's degree preferred. Three years experience preparing project management administrative plans and reports.	\$146.00
IT-87	Project Administration 3	Bachelor's degree preferred. Two years experience preparing project management administrative plans and reports.	\$123.00
IT-88	Project Administration 2	High school and three years of relevant experiences. Assists in preparing project management administrative plans and reports.	\$111.00
IT-89	Project Administration 1	High school and two years of relevant experiences. Assists in preparing project management administrative plans and reports.	\$87.00
IT-90	System Intern	Performs general entry level information technology support duties under direct supervision.	\$50.00
IT-91	Risk Mgmt. Specialist	Bachelor's degree required. Five years of experience in identifying critical information that must be protected, performing risk assessments of customer activities using proprietary tools, and developing mitigation measures.	\$146.00
IT-92	Sr. Risk Mgmt. Specialist	Bachelor's degree required. Ten years of experience in identifying critical information that must be protected, performing risk assessments of customer activities using proprietary tools, and developing mitigation measures. May provide security awareness, education and training.	\$171.00
IT-93	Sr. Info. Sys. Risk Mgmt Analyst	Bachelor's degree required. Ten years experience performing system security analyses including security audits, evaluations, and risk assessments of complex operational data processing communications systems and facilities and provide recommendations for countering detected vulnerabilities	\$182.00
IT-94	Principal Info. Sys. Risk Mgmt Analyst	Bachelor's degree required. Thirteen years experience performing system security analyses including security audits, evaluations, and risk assessments of complex operational data processing communications systems and facilities and provide recommendations for countering detected vulnerabilities	\$207.00
IT-95	Principal Risk Mgmt. Analyst	Bachelor's degree required. Thirteen years of experience in identifying critical information that must be protected, performing risk assessments of customer activities using proprietary tools, and developing mitigation measures. May provide security awareness, education and training.	\$194.00
IT-96	System Security Engineer	Bachelor's degree required. Five or more years experience applying computer science technologies to the design, development, evaluation, and integration of computer systems and networks to maintain system security.	\$182.00
IT-97	Security Specialist	Associate's Degree required. Four years of experience monitoring security standards and compliance	\$171.00
IT-98	System Administrator	High School and 2 years relevant systems administration experience.	\$130.00

PORTAL CONTENT MANAGEMENT SERVICES

Portal Content Management Services – On-site/Customer site support including:

Network Engineering Services and Administration Support

- Encompasses the Digital Library System TCP/IP network
- Includes customized integration and WAN distribution of non-network based commercial application databases.

Product Installation Services

- Level of product installation service dependent on specific requirements.

Training for Support and End-users

- Provided on-site
- Customized to the application and audience
- Remote training and troubleshooting applications also included

Maintenance of a bank of URL links

- URLs are built, tested, stored, maintained and available to users via the portal
- Service includes up to 150 links
- Service for greater than 150 links is available in increments of up to 50 links

Documentation of services provided

- Provided to the customer annually in electronic format

Unit Prices:

Up to 150 links: \$530,000

Additional 50 links: \$180,000

These prices are for work at a customer facility, using customer-provided equipment. Prices are set for a 1- year contract period. Payments may be made in one up-front, lump sum amount; or as a monthly payment, at the beginning of each month. At any time during the contract period, you may purchase a higher level of service for the duration of the established contract period. At the end of the established contract period, new services terms may be elected, and a new contract term will be set.
