MANTECH™
ALWAYS ADVANCING

Insider Threat

DETER. DETECT. DEFEND.

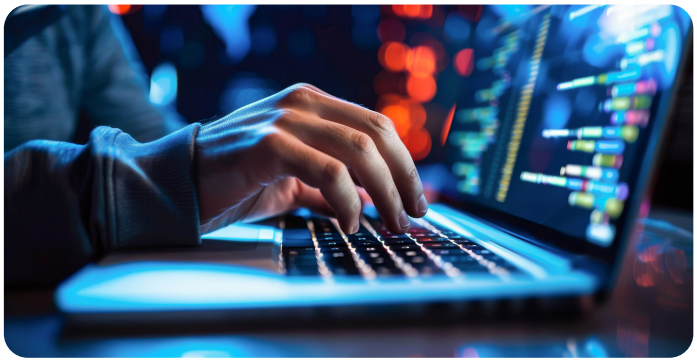
Insider threats pose a significant risk to organizations and their missions, demanding a comprehensive three-pronged approach of strong deterrence, early detection, and proactive defense.

Threat management goes beyond just security; it's about empowering your organization's mission to thrive in a world of evolving and complex threats. By taking proactive steps to protect their equities, organizations can sleep soundly, knowing they have implemented measures to safeguard their assets.

MANTECH can transform your organizations posture against insider threats, safeguarding your future, one insider at a time.

Proactive Threat Management

Our comprehensive Insider Threat Program Framework combines advanced technology with human expertise to create a robust defense highlighted by key features. Artificial Intelligence and Machine Learning capabilities enable proactive monitoring with real-time analysis. User Activity Monitoring on every endpoint across all security fabrics paired with User Entity resolution and Behavioral Analytics is essential to our approach.



MANTECH's tailored approach offers significant benefits to our customer's and their mission. We work with our customers to identify and assess their current maturity level, which allows us to work together to understand the necessary steps needed to enhance their insider threat strategies.

MANTECH provides a practical and actionable playbook, which enables organizations to apply key principles, standards, and emerging technologies into their insider threat programs. The result is a full-spectrum insider threat program that leverages technological solutions and human expertise to create a more secure environment, offering a powerful defense against potential insider threats.

Proven Track Record: Trust Our Expertise to Enable Your Mission

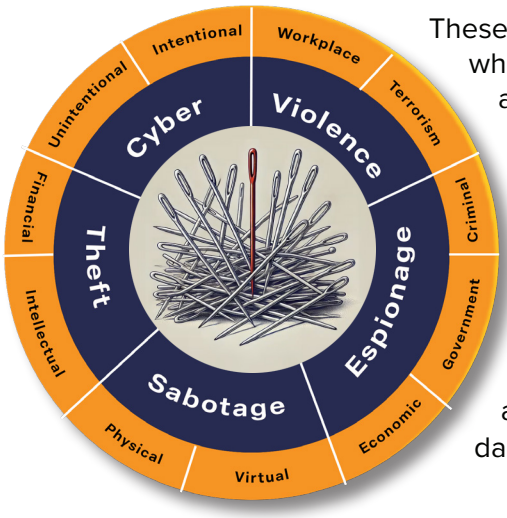
MANTECH has over two decades of experience adapting to rapidly changing, complex, and sensitive IT environments to support multiple customer's insider threat missions.

With our extensive experience spanning across the Intelligence, Defense, and Federal Civilian communities, MANTECH has developed a proven, reliable, robust, and unified program tailored to meeting the unique challenges of each customer's mission.

As new technologies emerge and insider threats become more complex, MANTECH proactively integrates, evolves, and enables our customers to stay ahead of threats, ensuring that the latest advancements are leveraged to enhance security and maintain the highest standards of protection.

Finding the Needle

Uncovering an insider threat is identifying the right needle in a stack of needles. It's about recognizing the subtle clues hidden within the indicators that set one apart from the rest. In the vast amounts of data and activities within an organization, these threats often blend in seamlessly, making detection incredibly challenging. It requires a keen eye for detail and an understanding of what constitutes normal behavior versus what might be a red flag. Subtle indicators, such as slight changes in an employee's access patterns, minor discrepancies in financial records, or unexpected communication patterns, can all be early signs of a potential threat.



These indicators are often easy to overlook or dismiss as insignificant. However, when viewed in the context of other behaviors and data points, they can reveal a pattern of malicious intent. The key to effective threat detection lies in the ability to correlate these subtle signs, leveraging advanced analytics and continuous monitoring to identify and respond to potential threats before they escalate into serious security breaches.

Just as finding the right needle in a stack of needles requires patience and precision, so does uncovering an insider threat. It demands a proactive approach, where organizations are not only reactive to clear threats, but are also vigilant in identifying and addressing the smallest anomalies. By doing so, they can protect themselves from the significant damage that an insider threat can inflict.

In business more than 57 years, MANTECH excels in cognitive cyber, AI, data collection & analytics, enterprise IT, systems engineering and software application development solutions that support national and homeland security.
