ACTP
ADVANCED CYBER TRAINING PROGRAM

ACTP V27

Course Learning Paths:

By transforming raw talent under the intense pressures of modern digital warfare, our curriculum accelerates careers beyond conventional limits to shape resilient, elite defenders who are not just educated—they are ***FORGED IN CYBER***

The newly aligned CNO training curriculum begins with Prerequisite Testing, routing students either to a self-paced **Fundamentals** bootcamp or directly into instructor-led Windows and Linux combined **Foundations** course. From there, trainees can advance into one of our four-week certification paths: **Black** (Windows), **Orange** (Linux), or **Red** (VREX, Embedded CNO). Students can also enroll in our specialized training modules a la carte. Students completing any full training path and module capstones will earn ACTP's **Certified Advanced Computer Programmer (CACP) Certification**.

CNO PREREQUISITES

PROFICIENCY TEST — *Validate Expertise & Accelerate Training*

Test straight into Foundations while keeping full access to Fundamentals, the essential prerequisite before unlocking the CACP Certification Paths.

PASS → **FOUNDATIONS**
- $18K per seat — A LA CARTE
- $34K per seat — FULL PATH
- 4 WEEKS

FAIL → **FUNDAMENTALS**
SELF-PACED
- Included w/Foundations
- 2 WEEKS

Former ACTP students have the option to bypass the CNO Prerequisites above and go straight to the Color Learning Paths.
